The manufacturing facilities are at Cementnagar, Kurmool District.

In 1988, when the VBC Group took over the management of the company from Mr. M. Somappa and Associates at the intervention of IDBI, late M. V. Subba Rao, representing VBC Group having Ferro Alloys and bottling units at Hyderabad and Vizag was appointed as Managing Director of the Company. Mr. V. Ramnath and Mr. A. Reddy and Associates, as the company was continuously incurring losses and the plant was not running on a continuous basis. Sri S. P. Y. Reddy was appointed as Chairman and Sri S. Sreedhar Reddy as Managing Director of the company .

On taking over of the management, the new promoters have taken various steps to revive the industry. The dues to the Banks/Financial Institutions have been repaid under One Time Settlement. Further, the company has announced a Voluntary Retirement Scheme to the employees of the company. The Government of India is focusing on the development of infrastructure like, express highways modernization of airports and similarly the Government of Andhra Pradesh is also undertaking major irrigations. Further there is high growth in the housing sector with liberalized sanctioning of the loans by banks and financial institutions and also the government's commitment for the construction of houses for the poor. In view of the above projects, there is a high demand for cement. To take advantage of these, the company has undertaken modernization scheme for expanding its capacity to 1 million tones per annum.

#### 4.13 Reasons for fall/rise in the total income and PAT in the relevant years

##### Year 2005-06:

During 2005-06 also the company's performance was adversely affected on account of suspension of operations and low capacity utilization at Cement Division due to non-availability of grid power, shortage of working capital and high overhead costs and closure of operations at Engineering Division from October 2005.

The performance of the Cement Division was very poor due to very low performance of the operations. The company had offered Voluntary Retirement Scheme to the staff and workers to reduce the man power cost. The company has also negotiated with the banks and financial institutions for settlement of their dues under OTS.

The capacity utilization of the Engineering Division was 12.32% as against 46% in the previous year due to paucity of working capital. The said unit requires huge investment to modernize the plant and machinery which is very old and there is cut throat competition in the market. The company was forced to stop production at the unit from October 2005 onwards due to insufficient working capital, spiraling increase in the cost of raw materials and other inputs and also due to cheaper imports of finished products. The company has offered VRS to all the staff and workers of the division and also paid all the final settlement dues.

##### Year 2004-05:

The performance of the company during 2004-05 was also adversely affected due to low production/capacity utilization on account of shortage of working capital and non-availability of grid power at Cement Division and high overhead costs.

The performance of the Cement Division during 2004-05 was very poor due to non availability of grid power for the entire first half year and paucity of working capital. The production was very low at 75670 M.Tonnes as against 109357 M. Tonnes in the previous year with a capacity utilization of 14% resulting in huge loss.

The Engineering Division's production was 4576 M. Tonnes as against 6991 M. Tonnes in the last year with a capacity utilization of 46% (previous year 70%) which is mainly due to paucity of working capital. However the division is withstanding and continuing its better performance inspite of severe competition and continuous increase in cost of raw materials and overhead costs.

##### Year 2003-04

The performance of the company during 2003-04 also adversely affected to depressed market conditions in the Cement Industry for a certain period and the cement plant could not run continuously due to shortage of working capital funds.

The performance of the Cement Division was very poor which is mainly due to shortage of working capital on one side and to some extent depressed prices of cement in the market during 1<sup>st</sup> and 2<sup>nd</sup> quarters of 2003-04.

The Engineering Division's performance was also affected due to lack of working capital mainly because transferring of funds from Cement Division. The Engineering Division performance was better and it was able to withstand the severe competition and also increase in cost of inputs.
