The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of Risk Factors:

- Some events may not be material individually but may be found material collectively;
- Some events may have a material impact qualitatively instead of quantitatively; and
- Some events may not be material at present but may have a material impact in future.

The financial and other related implications of the risks concerned, whether quantifiable have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk over another.

In this Draft Red Herring Prospectus, any discrepancies in any table between the total and sums of the amount listed are due to rounding off. In this section, unless the context requires otherwise, any reference to “we”, “us” or “our” refers to Shakti Infra Projects Limited.

INTERNAL RISK FACTORS

1. ***Our business is dependent on a limited number of customers, particularly our top customer, and the loss of, or a significant reduction in business from, one or more of these customers could materially and adversely affect our business, results of operations, cash flows and financial condition.***

A substantial portion of our revenue from operations is derived from a limited number of customers, resulting in significant customer concentration risk. Any loss of, or a significant reduction in business from, one or more of our key customers could have a material adverse effect on our business, results of operations, cash flows, and financial condition. Details of our top customer and top ten customers, along with their respective contributions to revenue over the last three financial years and the stub period, are provided below.

A significant portion of our revenue is derived from a limited number of customers, particularly our top customer ("Customer No. 1"), resulting in a high degree of customer concentration. The loss of Customer No. 1 or any of our other significant customers, or a material reduction in business from any of these customers, could have a material adverse effect on our business, results of operations, cash flows and financial condition. We cannot assure you that we will be able to

maintain historical levels of business from these customers or successfully replace any lost business in the event that we lose any of these customers.

In addition, adverse developments affecting our key customers, including financial distress, bankruptcy or insolvency, changes in management, or mergers and acquisitions, may negatively impact our business. If any of our major customers becomes insolvent, we may experience delays or defaults in payments, which could lead to an increase in receivables and potential write-offs, thereby adversely affecting our cash flows, results of operations and financial condition.

Our cash flows and liquidity may also be adversely affected if we lose one or more of our significant customers or if there is a substantial reduction in business volumes from them for any reason, including disputes, termination of contracts or disqualification. While we have not experienced any material loss of revenue due to the loss of a major customer in the past, there can be no assurance that such events will not occur in the future.

For further information, please refer to the chapter titled "Our Business" on page 146 of this Draft Red Herring Prospectus.

2. ***Our industry is capital-intensive in nature and involves relatively long gestation periods. We require substantial financing for our business operations, and our failure to obtain additional financing on commercially acceptable terms and in a timely manner could adversely affect our business, financial condition and results of operations.***

Our business is capital-intensive and requires substantial financing. If we are unable to obtain adequate financing on commercially acceptable terms and in a timely manner, our business, results of operations, cash flows and financial condition could be adversely affected. Projects in our industry typically require significant capital investment and involve relatively long development and gestation periods.

As a result, we are required to secure financing from various sources, including debt and equity. Our ability to obtain such financing on commercially acceptable terms depends on several factors, including overall economic conditions, capital market conditions, availability of credit from banks and financial institutions, investor confidence, our existing debt levels, and the timely execution and completion of our projects, many of which are beyond our control. Our future capital requirements may differ materially from our current estimates due to project delays, cost overruns, changes in our business plans, adverse economic conditions, unforeseen expenses and regulatory changes. If our capital requirements exceed our internal resources, we may need to seek additional debt or equity financing.

Additional indebtedness could increase our interest costs and subject us to additional covenants and restrictions under our financing agreements, which may limit our operational and financial flexibility. If we pursue additional equity financing, such financing may dilute the shareholding of our existing shareholders and may result in a reduction in earnings per share. Such dilution may also adversely affect the market price of our Equity Shares. Moreover, our ability to obtain additional financing on commercially acceptable terms, or at all, will depend on various factors, including our financial condition, results of operations, cash flows, existing indebtedness, and prevailing market and economic conditions. We cannot assure you that we will be able to renew or refinance our existing financing arrangements or obtain additional financing on commercially acceptable terms and in a timely manner. Any failure to obtain such financing could adversely affect our capital expenditure plans, business operations, cash flows and financial condition.

3. ***Our Company is dependent on third-party suppliers for the procurement of raw materials required for execution of our projects. Any disruption in the supply of such materials, or our inability to procure them in a timely manner or at commercially acceptable prices, may have a material adverse effect on our business, results of operations, cash flows, and financial condition.***

Raw material costs are dependent on prevailing commodity prices, which are inherently volatile and may fluctuate due to various macroeconomic and market factors. A significant portion of our raw material requirements is sourced from a concentrated base of suppliers, with a substantial portion of our purchases being attributable to our top supplier. Details of purchases from our top ten suppliers for the financial years ended March 31, 2026, March 31, 2025 and March 31, 2024 are provided below:

(Rs. In Lakhs)

Particulars	For the Year ended on		
	March 31, 2026	March 31, 2025	March 31, 2024
Contribution to purchase material and stock in trade of top 1 & 10 Suppliers			
Top 1 Suppliers (%)	85.31%	39.84%	46.30%
Top 10 Suppliers (%)	98.58%	95.48%	99.45%

There can be no assurance that strong demand, capacity constraints, supply chain disruptions or other issues affecting our suppliers will not result in shortages or delays in the supply of raw materials to us. Any significant or prolonged disruption in the supply of raw materials from our key suppliers, coupled with our inability to procure such materials from alternative sources in a timely manner and on commercially acceptable terms, may adversely affect our project execution timelines. This, in turn, could have a material adverse effect on our business, results of operations, cash flows and financial condition.

Further, as we do not have long-term supply agreements with our suppliers, we cannot assure you of the continued availability of raw materials from our existing suppliers on commercially acceptable terms. In the event of a substantial increase in raw material prices or restrictions on imports, we may face difficulties in sourcing materials on commercially acceptable terms, or at all. Any such inability to secure an adequate supply of raw materials on commercially acceptable terms could materially and adversely affect our business, results of operations and financial condition.

4. ***A significant portion of our revenue from operations is derived from the State of Maharashtra, resulting in a geographical concentration of our business.***

A significant portion of our revenue from operations is derived from the State of Maharashtra, resulting in a geographical concentration of our business. Revenue generated from Maharashtra amounted to ₹4,000.00 lakhs, constituting 73% of our revenue from operations for the financial year ended March 31, 2026, as per our Restated Financial Statements.

Such concentration exposes us to risks associated with adverse economic, regulatory, tax-related or political developments in the State of Maharashtra. Any adverse changes in State policies, taxes, levies, the regulatory framework or the political environment may adversely affect business conditions in the region and, consequently, our business, results of operations, cash flows and financial condition.

Although we have not experienced any material adverse effect arising from such geographical concentration to date, there can be no assurance that such risks will not materialize in the future. Any adverse developments in the State of Maharashtra could have a material adverse effect on our business, results of operations, cash flows and financial condition.

For further information, please refer to the section titled "Geographical-wise Distribution of Revenue" on page 253 of the Draft Red Herring Prospectus.

5. ***Our unsecured loans from our Director may be recalled at any time, which could adversely affect our business, results of operations and financial condition.***

Our Company has availed unsecured loans from our Director from time to time. As at March 31, 2026, the total amount outstanding to our Director was ₹528.51 lakhs on a standalone basis. As there are no fixed terms and conditions governing the repayment of these unsecured loans, our Director may recall such loans at any time. Any such repayment obligation could adversely affect our liquidity, business operations, cash flows and financial condition.

For further details regarding loans availed by our Company, please refer "Financial Information of our Company" on page 287 of this Draft Red Herring Prospectus.

6. ***Our significant dependence on project under the Jal Jeevan Mission ("Har Ghar Nal Se Jal") exposes us to risks relating to government funding, policy changes, and implementation delays, which may adversely affect our business.***

A significant portion of our projects is associated with government-driven initiatives such as the Jal Jeevan Mission ("Har Ghar Nal Se Jal"). Any reduction in funding, change in policy framework, delays in implementation, or discontinuation of

such schemes may have a material adverse effect on our business, results of operations, cash flows, and financial condition.

Our involvement in projects under the Jal Jeevan Mission exposes us to risks inherent in government-funded programs, including delays in tendering, award of contracts, project execution, and release of payments. Such projects are subject to budgetary allocations, administrative approvals, and policy decisions of the central and state governments, which are beyond our control. Any changes in government priorities, reduction in budgetary support, or modifications to the scope and execution framework of the scheme may adversely impact the availability of new projects and the execution of ongoing projects.

Further, delays in payments from government authorities or counterparties may affect our working capital requirements and cash flows. Additionally, projects under such schemes may be subject to stringent compliance requirements, performance standards, and audit scrutiny, which may increase our operational risks and costs.

We cannot assure you that the Jal Jeevan Mission will continue at its current scale, or that we will continue to secure projects under this scheme in the future. Any adverse developments in relation to this program could materially and adversely affect our business, prospects, and financial performance.

7. ***Our ongoing and future projects are subject to various execution risks and uncertainties inherent in the EPC and infrastructure industry. These projects may be delayed, modified, or cancelled due to factors beyond our control, including regulatory approvals, availability of resources, client requirements, funding constraints, and other external conditions. Any such delays, modifications, or cancellations could adversely impact our project timelines, cost estimates, and revenue recognition. This may, in turn, have a material adverse effect on our business operations, reputation, profitability, financial condition, and results of operations.***

Our order book represents the expected revenues from the unexecuted portions of our ongoing construction contracts. However, such projects are subject to execution risks and uncertainties, and may be delayed, modified, or cancelled due to factors including, but not limited to, client-related issues, our own performance, force majeure events, regulatory or legal impediments, or other circumstances beyond our control.

In certain projects, either we or our clients are required to undertake preliminary activities such as obtaining statutory approvals, licenses, permits, authorisations, making advance payments, opening letters of credit, or shifting existing utilities. Delays in the completion of such activities, whether due to client non-performance, our default, or force majeure events, may result in project delays and increased costs.

Any such delays may lead to imposition of liquidated damages, termination of contracts, or denial of extensions by our counterparties. In addition, we may incur significant cost overruns and may not be able to recognise revenue within the expected timelines if prescribed milestones or percentage of completion requirements are not met.

Further, our contracts may not fully protect us against delays, disputes, or additional costs. Although certain contracts include escalation clauses, such clauses may be interpreted narrowly or contested by our clients, potentially resulting in disputes regarding recovery of additional costs. As a result, our actual revenues and earnings may differ materially from those reflected in our order book.

Our contracts may also be amended, suspended, or terminated prior to commencement or during execution of the project. Even where projects progress as scheduled, there is a risk of counterparty default in payment of amounts due, resulting in delays or non-recovery of receivables. If any of these risks materialise, our business, prospects, reputation, profitability, financial condition, and results of operations may be materially and adversely affected.

8. ***Our inability to secure new projects or successfully compete in bidding processes could adversely affect our business growth, results of operations and financial condition.***

Our current business strategy does not involve direct contracting with Government departments; instead, we primarily undertake projects as a subcontractor or through arrangements with entities that have been directly awarded contracts by Government authorities. As a result, our ability to secure new projects is dependent on our relationships with such primary contractors and their success in obtaining Government contracts.

If these counterparties are unable to secure projects, reduce the scope of subcontracting, or choose to engage other subcontractors, it may adversely affect our ability to obtain new business. Additionally, we have limited control over the bidding process, pricing, and terms of the contracts awarded by Government departments to such primary contractors. Any unfavorable terms agreed upon between the Government and the primary contractor, or any delays, disputes, or non-performance by the primary contractor, may indirectly impact our operations, cash flows, and profitability.

Further, since we are not directly involved in the Government tendering process, we may have limited visibility into project pipelines and reduced influence over project selection, timelines, and execution conditions. If we are unable to maintain strong relationships with existing contractors or identify new contracting partners aligned with our capabilities and financial expectations, it could result in reduced project opportunities and increased uncertainty in our business operations and financial performance.

Accordingly, our dependence on third-party contractors for access to Government projects exposes us to risks that could materially and adversely affect our business, results of operations, and financial condition.

9. Our Company has a limited operating history and has not completed any projects in its own name, which may adversely affect our ability to establish a track record of successful project execution.

Our Company was incorporated on August 12, 2022 and has a limited operating history in its present form. The projects undertaken by our Company are executed over an extended period and are currently under execution. Further, our ongoing projects are being executed on a back-to-back basis pursuant to contracts awarded by principal contractors and our performance is dependent on the timely performance of such principal contracts. Consequently, prospective investors may have limited ability to evaluate our operational performance based on our track record of completed projects.

Although our Company has not completed any project since its incorporation, our Managing Director and Promoter, Amitendra Singh, possesses experience in the execution and completion of water treatment plants, water supply schemes, irrigation projects, sewerage systems and other infrastructure projects. His experience and technical expertise have contributed to the management and execution of our ongoing projects.

However, there can be no assurance that the prior experience of our Managing Director and Promoter will necessarily translate into the successful or timely completion of our ongoing or future projects. Any delay, disruption or default by a principal contractor, termination of the principal contract, cost overruns, execution challenges or failure to complete projects in accordance with contractual specifications may adversely affect our business, financial condition, cash flows, results of operations and future prospects. Accordingly, investors should not place undue reliance on the prior experience of our Managing Director and Promoter as an indicator of our Company's future performance.

10. Our projects are undertaken on a subcontract basis and are subject to various contractual obligations and performance requirements, and any failure to comply with such obligations or delays or non-performance by our primary contractors could adversely affect our ability to execute and complete our projects

Our projects are undertaken on a subcontract basis from entities that have been directly awarded contracts by Government authorities or other principal employers, rather than being awarded to us directly. Under such arrangements, we execute projects either in full or in part, typically for a fixed fee or on a profit-sharing basis, in accordance with the terms agreed with the primary contractor or customer.

While we retain limited operational discretion, key decisions may require consultation with, or approval from, the primary contractor, principal employer, or relevant regulatory authorities, thereby restricting our flexibility in project execution.

Further, our reliance on primary contractors exposes us to risks associated with their performance, financial stability, and contractual arrangements with Government authorities. Any delays, disputes, or non-performance by such primary contractors may adversely affect our ability to execute and complete projects in a timely manner. Additionally, in the event of delays or failure to meet contractual obligations, we may be subject to penalties, indemnification obligations, or claims from the primary contractor or other stakeholders.

Any disputes arising under these subcontracting arrangements may result in delays, suspension, or termination of projects. Such events could materially and adversely affect our business operations, financial condition, cash flows, and reputation.

11. Our business is manpower-intensive and dependent on the availability of contract labour through subcontractors; any shortage, disruption, or increase in labour costs may adversely affect our operations and financial performance.

Our business is labour-intensive and a significant portion of our projects are executed on a subcontract basis pursuant to contracts awarded to primary contractors by Government authorities or other principal employers. Accordingly, we are dependent on the availability of sufficient contract labour through our subcontractors at various project locations for the timely execution of such projects.

The number of contract labourers engaged varies depending on the scale and nature of the work awarded to us by such primary contractors, as well as the availability of labour at the relevant locations. We may face challenges in securing the required number of contract labourers due to several factors, including disputes with subcontractors, strikes, work

stoppages, higher wages or compensation offered by competitors, or changes in labour laws and regulations that may restrict the deployment of contract labour.

Further, as we typically engage labour on a daily-wage basis through subcontractors, the availability and continuity of such labour may vary, which could result in higher absenteeism, labour turnover and operational disruptions. Any such disruption may adversely affect our ability to meet project timelines agreed with primary contractors, which could expose us to penalties, indemnification obligations or claims and may adversely affect our ability to secure future projects.

Additionally, we are subject to various laws and regulations relating to labour welfare and benefits, including minimum wages, working conditions, social security and employee insurance. Any changes in applicable labour laws, including increases in minimum wages, restrictions on working hours or requirements to provide enhanced welfare facilities, may increase our operating costs and adversely affect our profitability.

Although we have not experienced any material disruptions arising from labour-related issues during the past three financial years, there can be no assurance that such issues will not arise in the future. Any significant disruption in the availability of contract labour or disputes with our subcontractors or contract labourers could materially and adversely affect our business, results of operations, cash flows and financial condition.

12. The profitability of our projects is inherently uncertain and may vary significantly, making it difficult to predict or compare our financial performance across projects.

Our revenues and profitability are subject to significant variability and are inherently difficult to predict, as they depend on multiple factors, including the size, scope, and stage of completion of our projects, scheduled commencement timelines, fluctuations in raw material prices and availability, and potential delays in execution. The expected commencement dates of our projects are based on current assumptions and market conditions, which are subject to change and may impact project timelines and cost structures.

Our financial performance may also fluctuate across reporting periods due to variations in the number of projects undertaken, delays in project execution, challenges in scaling operations, and inaccuracies in estimating the resources and time required for completion. Further, as we recognize revenue using the percentage of completion method, our reported revenues and profits may differ significantly between financial periods depending on the progress achieved in ongoing projects.

As a result, the financial performance in any particular period may not be indicative of our overall annual performance and may fall short of market, analyst, or investor expectations. Such variability could materially and adversely affect our business, financial condition, and results of operations.

13. Our operations are exposed to risks from adverse weather conditions and natural disasters, and our insurance coverage may not be sufficient to fully protect us from such losses.

Our business operations, particularly construction activities at project sites, are exposed to risks arising from adverse weather conditions and natural disasters, such as heavy rainfall, floods, cyclones, and other extreme climatic events. Such conditions may disrupt our project execution by necessitating temporary suspension of construction activities, evacuation of personnel, postponement of material deliveries, and repair or replacement of damaged equipment and infrastructure.

Prolonged or severe weather events may cause significant damage to ongoing projects, construction materials, and machinery, leading to delays in project timelines and increased costs. During such periods of disruption, while our project activities and revenue generation may be curtailed or delayed, we may continue to incur fixed operating expenses, including employee costs, equipment-related expenses, and other overheads, which could adversely affect our profitability and cash flows.

We have experienced instances in the past three financial years where natural phenomena, including heavy rainfall, have resulted in delays in revenue recognition and an increase in fixed costs. Although we undertake measures to mitigate the impact of such events, including project planning and risk management practices, there can be no assurance that such measures will be sufficient to fully offset the adverse effects of severe weather conditions or natural disasters in the future.

Accordingly, any significant disruption caused by adverse weather conditions or natural calamities could materially and adversely affect our business operations, financial condition, cash flows, and results of operations.

14. Our reliance on third-party subcontractors exposes us to risks relating to their performance, quality of services, equipment and materials, and compliance with applicable laws, which could adversely affect our project execution and financial performance

We engage third-party subcontractors to execute certain portions of our contracts and to provide services and manpower required for the execution and completion of our projects. While we have not experienced any material delays or performance issues with our subcontractors during the past three financial years, there can be no assurance that such delays or issues will not occur in the future.

Any failure or delay by our subcontractors in performing their obligations in a timely and satisfactory manner may result in delays in project execution, increased costs and an inability to meet project timelines. We are also exposed to risks relating to the quality of services, equipment and materials provided by our subcontractors, which may adversely affect the execution and completion of our projects.

Although certain of our subcontracting arrangements may include indemnity provisions in our favour for losses arising from subcontractor defaults, we may nevertheless remain responsible for defects in design, workmanship or quality issues arising during the execution phase or during the applicable defect liability period. Such liabilities could result in additional costs, financial claims, penalties or reputational damage.

Further, there can be no assurance that our subcontractors will maintain valid registrations and necessary approvals and remain compliant with applicable labour and other laws in India. Any such non-compliance by our subcontractors could adversely affect our ability to execute projects in accordance with applicable contractual and regulatory requirements.

Accordingly, any adverse developments relating to our subcontractors could materially and adversely affect our business, results of operations, cash flows and financial condition

15. Delays in completing our current and future projects, and any resulting time and cost overruns, could materially and adversely affect our business, results of operations, cash flows and financial condition.

Our projects are generally undertaken in accordance with defined completion schedules. However, the timelines for completion are based on estimates and may be subject to delays due to various factors, including unforeseen engineering or technical challenges, force majeure events, delays in or unavailability of financing, unexpected increases in project costs, changes in project scope, delays in obtaining or renewing required governmental approvals, and other changes mutually agreed with our clients. Such delays may result in the extension of project timelines and may adversely affect our ability to complete projects within the originally estimated schedules and costs.

In connection with our contractual obligations, we may be required to furnish bank guarantees in favour of our clients, which may be invoked in the event of delays or failure to perform our contractual obligations within the agreed timelines. Where project schedules are revised or extended, we may also be required to extend the validity of such bank guarantees, which may result in additional costs and may increase our financial and contractual obligations.

While we have not experienced delays in the execution of our completed projects to date (for further details, please refer to "Our Business – Our Completed Projects" on page 184), there can be no assurance that our current and future projects will always be completed within the scheduled time frames. Any delay in project execution may result in claims, penalties, invocation or extension of bank guarantees, additional financing requirements or other liabilities under our contractual arrangements. Further, delays may affect our relationships with clients and our ability to undertake or execute other projects in accordance with their respective schedules.

In addition, although we have not experienced material time or cost overruns in our completed projects to date, there can be no assurance that we will not experience such overruns in the future. Delays in project execution may result in increased costs relating to labour, materials, equipment, financing and other project-related expenses, and such additional costs may not be fully recoverable from our clients or otherwise adequately mitigated. We may also be exposed to claims, damages, penalties or other liabilities arising from delays or non-compliance with contractual obligations.

Any significant delay in the completion of our projects, or any resulting time or cost overruns, could adversely affect our project margins, cash flows and working capital requirements and may require us to deploy additional financial and other resources. Accordingly, any such delays, cost overruns, claims, penalties or other related liabilities could materially and adversely affect our business, results of operations, cash flows and financial condition.

16. Our borrowings are secured by charges over our assets and other security interests, and any default under our financing arrangements could result in enforcement of such security and adversely affect our business, financial condition and cash flows.

We have created security in favour of our lenders in respect of the working capital requirements aggregating to ₹ 2,000 lakh availed by our Company. Such security has been established by way of a charge over our present and future inventories,

inventory receivables, book debts, as well as fixed deposits maintained by the Company and followed by personal guarantee by the promoters of the company. These arrangements are typical for working capital and credit facilities; however, they impose certain restrictions and obligations on our operations and financial flexibility.

As on August 31, 2026, the total amount outstanding and payable by our Company under the cash credit facilities is ₹ 1,872.08 Lakhs. The level of utilization of these facilities may vary from time to time depending on our working capital requirements and business conditions.

In the event of any default in repayment of principal amounts, interest, or any other dues in relation to the aforementioned facilities, the lenders shall have the right to enforce the underlying security. This may include, inter alia, taking possession of and/or selling the secured assets, appropriating proceeds from fixed deposits, and exercising other rights available under applicable laws and financing documents. Any such enforcement action could disrupt our operations, affect our ability to continue as a going concern, and materially and adversely impact our business, financial condition, cash flows, and results of operations.

Furthermore, the enforcement of such security interests could lead to cross-defaults under our other financing arrangements, if any, thereby exacerbating the financial stress on the Company

For further details of our secured borrowings, including the terms of repayment, interest rates, security coverage, and related covenants, please refer to the chapter titled "Financial Statements" on page 287 of this Draft Red Herring Prospectus.

17. ***Our Company may incur penalties or liabilities for delays in filings with certain provisions of the GST Act, Income Tax Act, and other applicable laws in the last 3 Years.***

The Company has, in prior periods, experienced certain delays and procedural lapses in statutory compliances, including delayed or erroneous filing of returns and e-forms under applicable laws such as the GST Act, the Income-tax Act, and other regulations. The Company has since strengthened its compliance processes and taken corrective actions. However, it may be subject to penalties or liabilities arising from such past instances, which could have a limited impact on its financial condition and results of operations.

The details of late filings in past 3 years are given below:

The Company confirms that, in the event any action is initiated by the relevant regulatory authorities in the future, it will comply with all applicable requirements and directions in a timely manner. The delays in compliances were primarily attributable to certain weaknesses and gaps in internal controls, which impacted the timely execution and filing of statutory returns.

The Company acknowledges these deficiencies and has undertaken corrective measures to strengthen its internal control and compliance framework, including the appointment of a qualified Company Secretary and Chief Financial Officer.

While the Company has taken steps to mitigate such risks, any continued or future non-compliance may adversely affect its reputation, invite increased regulatory scrutiny, and, in certain circumstances, result in legal or penal action. Any such developments could have a material adverse effect on the Company's business, operations, financial condition, and prospects.

18. ***Our Company's registered office premises are leased from a member of the Promoter Group. Any non-renewal, termination, or modification of the terms of such lease arrangement may result in increased rental costs or require relocation, which could adversely affect the Company's operations.***

Our registered office premises are taken on lease from a member of the Promoter Group. Details of these properties are set out below:

S. No	Address of the Property	Name of the Owner/ Lessor	Tenure	Rent (Amount in ₹)	Purpose
1.	S/o Phool Singh, Near Vikram Child Care, Kalu Kuwan, Baberu Road, Banda, Uttar Pradesh, India, 210001	Phool Singh	11 Months	22,000/- on Monthly Basis	Registered Office

The Company's registered office and corporate office premises are leased from members of the Promoter Group and accordingly constitute related party transactions. In respect of the registered office and corporate office located in Banda, the rent payable by the Company is currently lower than the prevailing market rates for comparable properties. The Board of Directors has, by way of a resolution, noted that such arrangement is not on an arm's length basis; however, it is presently beneficial to the Company in view of the lower rental outgo.

There can be no assurance that the Promoter Group will continue these arrangements or renew them on the same or similarly favorable terms upon expiry. The Promoter Group may, at its discretion and in accordance with the terms of the agreements, choose not to renew, terminate the leases, or seek to revise the commercial terms. In such circumstances, the Company may be required to relocate to alternative premises, which may involve higher costs and logistical challenges.

Any non-renewal, early termination, or material adverse change in the terms of these lease arrangements, particularly in relation to the Company's corporate and registered offices, could result in operational disruption, inconvenience to employees and clients, and may have an adverse effect on the Company's business, financial condition, and results of operations.

19. ***Our Company has not complied or delayed in compliances with some statutory provisions of the Companies Act 2013. Such non-compliance and delayed compliance may attract penalties against our company which could impact the financial position of us to that extent.***

20. Our trademarks related to our company logo are pending and we do not own the trademark legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third-party intellectual property rights.

The Company has applied for registration of its logo under Class 37 of the Trade Marks Act, 1999. As of the date of this document, the said trademark applications are under process and have not yet been registered. Accordingly, the Company does not currently enjoy the statutory protections available to owners of registered trademarks under applicable law.

There can be no assurance that the Company will be able to obtain registration of its trademarks, including under Class 42 or any other applicable class, in the future. Further, there can be no assurance that third parties will not infringe upon the Company's intellectual property rights, which may adversely affect its business, reputation, goodwill, and future prospects.

The Company also cannot assure timely registration of its trademark applications, or that such applications will be granted by the relevant authorities at all. In the event of any infringement or dispute, the Company may be required to initiate or defend legal proceedings to establish the validity and scope of its intellectual property rights. Such proceedings may be time-consuming, expensive, and the outcome cannot be predicted with certainty.

Additionally, the Company may not always be able to detect unauthorized use of its intellectual property or take timely and effective measures to enforce or protect its rights.

The details and status of the Company's trademark applications are set out below:

Trademark	Registration No/ Application No	Class of Registration	Trademark Type	Date of Issue/ Application	Valid upto	Status
SHAKTI INFRA PROJECT LIMITED	**7199199**	37	Device	August 26, 2025	NA	Under Examination

SHAKTI	**7199200**	37	Device	August 26, 2025	NA	Objected

However, our Company has not faced any instances of trademark infringement or disputes relating to our unregistered company logo or product names till date. We cannot assure that such situations will not arise in the future, and any potential infringement or inability to secure registration could adversely affect our business, reputation, and financial condition.

21. We have experienced negative cash flows in operating and financing activities and any negative cash flows in the future could adversely affect our financial conditions and results of operations.

Our Company had negative cash flows from our operating activities as well as financing activities in all of the three previous financial year(s) as per the Restated Audited Standalone Financial Statements and the same are summarized as under:

(Amount in Lakhs)

Particulars	As at March 31, 2026	As at March 31, 2025	As at March 31, 2024
Net Cash used in Operating Activities (A)	-654.36	-1162.86	-226.51
Net Cash used in / Generated from Investing Activities (B)	-516.80	-332.78	-172.11
Net cash generated from Financing Activities (C)	1160.39	1290.28	622.56

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

22. Our Promoter have provided personal guarantees in connection with certain borrowings availed by the Company. The continuation of such guarantees is not assured. Any revocation, withdrawal, or non-renewal of all or any of these personal guarantees may adversely affect the terms of our borrowings, including the availability, cost, or conditions thereof. Consequently, this may have a material adverse effect on the Company's business, financial condition, results of operations, cash flows, and future prospects.

Our Promoters have provided personal guarantees in connection with certain borrowings availed by the Company from banks to secure our loan facilities. Such guarantees are typically subject to renewal, review, and continued acceptance by the respective lenders, and there can be no assurance regarding their continued availability.

In the event that any of these personal guarantees are revoked, withdrawn, not renewed, or otherwise become unavailable, our lenders may, at their discretion, require the Company to provide substitute security or alternative guarantees acceptable to them. In certain circumstances, lenders may also exercise their contractual rights to cancel the relevant credit facilities and/or demand immediate repayment of the outstanding amounts thereunder.

If the Company is unable to provide replacement security or guarantees on terms satisfactory to the lenders, it may be required to refinance such borrowings through alternative funding sources. However, such financing may not be available on commercially reasonable terms, or at all, given prevailing market conditions and the Company's financial position at the relevant time.

Alternatively, the Company may be required to accept more restrictive covenants or less favorable terms under existing or future financing arrangements, which could adversely affect its ability to raise additional capital, manage liquidity, or pursue its business strategy.

23. Our success depends on our ability to attract and retain senior management and skilled personnel, and the loss of key personnel could adversely affect our business.

Our continued success depends significantly on the contributions, leadership and performance of our senior management and other key employees. We also depend on our ability to attract, develop and retain skilled professionals and personnel, particularly project managers, engineers and other technically qualified and experienced personnel.

The loss of services of members of our senior management or our inability to recruit, train or retain sufficient skilled personnel could adversely affect our operations, project execution capabilities and profitability. Competition for

experienced personnel in the construction industry may also make it difficult for us to retain existing employees or attract suitably qualified personnel.

Further, we may be required to increase wage levels or other compensation to attract or retain employees, which could increase our operating costs. If we are unable to attract or retain sufficient skilled personnel, our ability to bid for and execute new projects and sustain our business could be adversely affected, which may result in a decline in our revenues. Any significant loss of key personnel or inability to attract and retain skilled personnel could materially and adversely affect our business, financial condition and results of operations.

24. Failure to furnish or maintain the required Performance Bank Guarantees within the stipulated timelines may result in contractual penalties and adversely affect our business

We are required to furnish a Performance Bank Guarantee ("PBG") to the relevant authority for each project awarded to us. We are also obligated to ensure that such Performance Bank Guarantees remain valid, enforceable, and in full force and effect for the entire duration of the contract, including the defect liability period, until all defects identified under the contract have been duly rectified and obligations fully discharged.

Any delay, failure, or inability to submit the required Performance Bank Guarantee within the prescribed timelines may result in serious contractual consequences, including termination of the contract and/or invocation or forfeiture of the bid security. In such circumstances, we may also be deemed ineligible for the relevant project, and the employer may proceed to award the contract to another bidder at our risk and cost.

Further, repeated instances of non-compliance may adversely impact our reputation and standing with contracting authorities and could lead to blacklisting or disqualification from participating in future tenders, thereby materially affecting our business operations and financial condition.

Typically, the Performance Bank Guarantee amounts to approximately 3% of the contract value; however, the exact percentage may vary depending on the specific terms and requirements of each project.

25. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

We have entered into related party transactions with our Promoter, Promoter Group, Group Entities and Directors which are at an arm's length basis from time to time. A summary statement of the related party transactions is as follows:

For details of these transactions, please refer ―*Annexure __ – Related Party Transactions under section titled―Financial Statements*‖ on page no. 165 of this Draft Red Herring Prospectus.

We cannot assure you that we will be able to maintain favourable terms in our transactions with related parties, or that any future transactions we may enter into with them will be on terms that are advantageous to us. While we believe that all such related party transactions undertaken to date have been conducted on an arm's length basis, we cannot guarantee that better terms could not have been achieved had these arrangements been entered into with unrelated third parties.

We may continue to enter into related party transactions in the future, which could potentially give rise to conflicts of interest. However, in accordance with applicable provisions of the Companies Act, 2013 and the SEBI (LODR) Regulations, all such transactions, as and when undertaken, will be subject to the necessary approvals of the audit committee, board of directors, and/or shareholders, as required.

Despite these governance measures, there can be no assurance that related party transactions will not adversely impact our business, results of operations, cash flows, or overall financial condition.

26. Any disproportionate increase in labour costs including increase in wage/salary demand, labour unrest or labour claims arising from accidents may adversely affect our business operations and financial conditions.

As our business operations continue to expand, we may need to increase our workforce in order to support project execution and sustain operational efficiency. This growth in employee strength could require us to recruit a larger number of skilled and unskilled personnel in the future.

While we have not experienced any instances of labour unrest in the past, we cannot assure you that such situations will not arise in the future. Any occurrence of labour disputes, work stoppages, or unrest could disrupt our operations, delay project execution, and adversely impact our overall productivity and performance.

Additionally, there is a possibility that labour costs may increase significantly due to rising wage expectations, market demand for skilled manpower, or changes in applicable labour regulations. Such increases may not always be predictable or within our control. In the event that we are unable to pass on these increased costs to our customers through corresponding adjustments in contract prices, our profitability and cost structure may be adversely affected.

Any significant increase in employee costs, combined with potential labour-related disruptions, could have a material adverse impact on our business operations, financial condition, cash flows, and results of operations.

27. Our operations are exposed to risks arising from industrial accidents, which may occur at our project sites and could have an adverse impact on our business activities, project execution timelines, financial performance, and overall operational continuity.

The use of heavy machinery and equipment, as well as the handling of sharp or complex mechanical components by workers during construction activities, inherently involves operational risks. Such activities may, in certain circumstances, result in industrial accidents at project sites. These incidents could lead to injury to workers, employees, or other persons present at the site, and in severe cases may even be fatal. They may also cause damage to property, machinery, or equipment, thereby disrupting ongoing operations and adversely impacting project timelines and execution efficiency.

At present, we do not maintain group accident insurance for our employees or workers. While we may have certain insurance coverage for specific equipment or assets, there is no assurance that such coverage will be adequate to fully compensate for all losses, damages, or liabilities arising from industrial accidents. In addition, certain risks or types of incidents may not be covered under our existing insurance arrangements.

There can also be no assurance that, where insurance coverage exists, claims will be honoured in full, in part, or within a reasonable timeframe. Any delay, denial, or inadequacy of insurance compensation may require us to bear the associated costs directly.

Accordingly, any occurrence of industrial accidents or safety incidents at our sites, or any inadequacy in insurance coverage, could adversely affect our operations, increase our costs, and have a material impact on our business, financial condition, and results of operations.

28. We cannot assure that the construction, execution, and completion of our projects will be entirely free from defects, deficiencies, or workmanship issues, whether arising during the construction phase or becoming apparent after completion.

We cannot assure that we will always be able to complete the construction or development of our projects strictly in accordance with the required specifications, nor can we guarantee that our projects will be entirely free from defects, deficiencies, or variations from contractual requirements.

If any work is found to be unsatisfactory, we may be required to rectify, re-perform, or redo such work in accordance with the instructions of the principal employer or client, without any additional compensation. Similarly, if any defects, faults, or damages are identified in our work—whether due to execution issues or factors beyond our control—we may be obligated to undertake corrective measures at our own cost. Such obligations could result in significant additional expenditure, contractual liabilities, and potential losses under our project contracts, which may adversely affect our financial performance and results of operations.

We would like to state that, as of the date hereof, no material defects have been identified in the completed projects. However, any failure to meet contractual specifications or rectify defects in a timely manner may also lead to adverse consequences such as cancellation or non-renewal of future contracts or sub-contracts, forfeiture or refund of retention monies or performance-related deposits held with our principal employers or contractors, and damage to our reputation in the market. This may result in dissatisfaction among customers, negative publicity, potential disputes or litigation, and a loss of confidence among existing and prospective clients.

Any of these factors, individually or in combination, could have a material adverse effect on our business, financial condition, and results of operations.

29. We have issued Equity Shares during the last one year at a price that may be below the Offer Price.

During the last one year we have issued Equity Shares at a price that is lower than the Offer Price as detailed in the following table:

Date of Allotment	No. of Equity Shares allotted	Face Value	Offer Price	Nature of consideration	Nature of allotment
August 01, 2026	53,86,640	10	NIL	Other than Cash	Bonus Issue

For details of the Allottees, please refer "Capital Structure" on page 61 of this Draft Red Herring Prospectus.

30. Our Company/ Promoters is involved in certain legal proceeding(s) potential litigations. Any adverse decision in such proceeding(s) may render us/them liable to liabilities/penalties and may adversely affect our business and results of operations.

We are involved in certain legal proceedings which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, and appellate authorities. We cannot provide assurance that these legal proceedings will be

decided in our favour. Any adverse decisions in any of the proceedings may have a significant adverse effect on our business, results of operations, cash flows and financial condition. A classification of these legal and other proceedings are as follows: A summary of pending legal proceedings and other material litigations is provided below:

31. The Company has filed applications for adjudication in respect of certain filings made with the Registrar of Companies ("RoC"). Any adverse order passed by the adjudicating authority, including the imposition of penalties or other directions, may adversely affect our financial condition, reputation and regulatory compliance status.

In the course of our corporate secretarial and statutory compliance review, it was identified that certain forms required to be filed with the Registrar of Companies ("RoC") under the provisions of the Companies Act, 2013 and the rules made thereunder were not filed within the prescribed timelines and/or involved procedural non-compliances. Accordingly, we have filed applications before the competent adjudicating authority under the Companies Act, 2013 seeking adjudication in respect of such matters. As on the date of this Draft Red Herring Prospectus, the adjudication proceedings are pending and no final order has been passed by the competent authority.

Sr. No.	Form Name	SRN	Description of non-compliance
1.	GNL - 1	AC4784406	The appointment of the First Auditor was duly approved by the Board of Directors, and the auditor was eligible for appointment under the provisions of the Companies Act, 2013. At the time of such appointment, filing of Form ADT-1 for the First Auditor was not mandatory. However, due to an inadvertent error and lack of proper understanding regarding the tenure of the First Auditor, Form ADT-1 (SRN: F86499845) reflected the period of appointment as 12.08.2022 to 31.03.2027 instead of the tenure prescribed under Section 139(6) of the Companies Act, 2013, i.e., up to the conclusion of the First Annual General Meeting of the Company.
2.	GNL - 1	AC4784478	The Company inadvertently failed to comply with the

			provisions of Section 134 of the Companies Act, 2013 in respect of the Financial Statements and/or the Board's Report for the Financial Year 2024-25. The Financial Statements were approved by the Board of Directors on 29.09.2025. At the relevant time, Ms. Kamna was holding the office of Company Secretary, having been appointed on 25.08.2025. It was further observed that the particulars of the Board Meeting held on 05.09.2024 were inadvertently omitted from the Board's Report, though disclosure thereof was required under Section 134(3)(b) of the Companies Act, 2013. The omissions occurred due to oversight while compiling the relevant information.
3.	GNL - 1	AC4784502	It was observed that Form MGT-7 for the relevant financial year contained incomplete share transfer details and incorrect dematerialisation particulars, resulting in issues relating to Section 92(1)(d) of the Companies Act, 2013. Further, the Board Meeting held on 05.09.2024 was inadvertently omitted from Form MGT-7, resulting in an issue relating to Section 92(1)(f) of the Companies Act, 2013.

Further, our Company has identified certain instances of non-compliance with Section 62(1)(a) of the Companies Act, 2013, in relation to rights issues, as disclosed under the chapter titled "Capital Structure". Such instances include allotment of shares prior to receipt of the requisite allotment money, receipt of excess application money and transfer of shares, among other matters for the allotment made on March 30, 2024 through Rights Issue to Promoters.

The outcome of the adjudication proceedings is subject to the determination of the competent authority, and there can be no assurance that the applications will be disposed of on terms favorable to us. The adjudicating authority may impose monetary penalties on the Company and/or its present or past directors, key managerial personnel or officers in default, issue directions requiring further compliances, rectification of records, or pass such other orders as it may deem appropriate under the applicable provisions of the Companies Act, 2013.

In the event that the adjudicating authority imposes penalties or directs us to undertake additional corrective actions, we may incur additional financial liabilities, legal and professional costs and management time in complying with such directions. Further, if the adjudicating authority identifies any additional instances of non-compliance during the course of the proceedings, we may be required to initiate further remedial actions or make additional statutory filings, which could result in increased compliance costs and administrative burden.

Although we have taken steps to strengthen our internal compliance framework, including reviewing our statutory compliance processes and implementing measures to enhance monitoring of corporate filings by appointing the Company Secretary & Compliance Officer, there can be no assurance that the adjudication proceedings will be concluded without adverse observations or financial implications. Any adverse findings, penalties or directions issued by the competent authority may adversely affect our reputation, corporate governance profile, relationships with investors, lenders, customers and other stakeholders and could also result in increased regulatory scrutiny in the future.

Any of the foregoing events, individually or collectively, may materially and adversely affect our business, financial condition, cash flows, results of operations and future prospects.

32. Competitive pricing pressure may limit our ability to maintain or increase our product prices, potentially leading to a decline in revenue, gross margin, and profitability. This may materially and adversely impact our business, cash flows, financial condition, and results of operations.

The infrastructure construction industry in which we operate is highly competitive and often characterised by price-sensitive bidding processes. Intense competition from existing and new market participants, including their ability to offer lower bid prices for similar projects, may exert downward pressure on our pricing and limit our ability to secure contracts at commercially viable margins. In many cases, project awards are based on competitive quote, where pricing plays a critical role, and any aggressive pricing strategies adopted by competitors may adversely affect our order book and revenue visibility.

Additionally, any deviation from our internal pricing policies or bid estimation guidelines—whether due to competitive pressures, estimation errors, or other factors—may lead to underpricing of projects. This could not only impact our

profitability but may also affect our brand positioning, credibility, and perceived reliability in the market, particularly if it results in compromised execution or cost overruns.

In response to such pricing pressures, we may seek to optimise project costs through more efficient project management, value engineering, strategic sourcing of materials, and negotiation with subcontractors and suppliers. However, there can be no assurance that such measures will be sufficient to fully mitigate the impact of reduced pricing or maintain our targeted margins.

If we are unable to effectively manage competitive pricing pressures, adhere to disciplined bidding practices, or achieve cost efficiencies in project execution, our revenues, profitability, cash flows, and overall financial condition could be materially and adversely affected.

33. Certain members of our Board of Directors and KMPs may have limited experience in dealing with the requirements applicable to listed companies

Our Board of Directors comprises executive and non-executive directors and our Company has KMPs with varying levels of experience in dealing with the requirements applicable to listed companies. While certain members of our Board and KMPs may have limited or no prior experience of working in a listed company, others may have prior experience in listed entities. Accordingly, certain members of our Board and KMPs may not be fully familiar with all regulatory, compliance and disclosure requirements applicable to a listed entity.

Any lack of familiarity with such requirements may increase the risk of delays, errors or omissions in making required disclosures, filings or intimations and may result in regulatory action, penalties or other consequences. Further, limited experience in a listed company environment may affect the timely implementation of applicable compliance and corporate governance requirements. Any such lapses could adversely affect our business, financial condition and results of operations and our reputation

34. Our results of operations and cash flows could be adversely affected if the Company are unable to collect the dues and receivables from the clients.

Our Company's financial performance, cash flows, and overall business operations are dependent on the timely receipt of payments from our clients, including principal contractors. In many cases, our clients are engaged in projects awarded by government authorities, and their ability to make payments to us is directly linked to the receipt of funds from such authorities.

Accordingly, any delay in payments from government bodies to our principal contractors may result in corresponding delays in payments being released to us. Additionally, delays may also arise due to client-side approval processes, certification of work completed, or administrative procedures. As a result, we may experience delays in raising invoices, realising receivables, or collecting outstanding dues.

Such delays or non-receipt of payments could adversely impact our working capital position and liquidity, thereby affecting our ability to meet day-to-day operational expenses, service financial obligations, and fund ongoing or future projects. Prolonged delays may also impact project execution timelines and strain our relationships with subcontractors and suppliers.

If such issues persist, they could have a material adverse effect on our business operations, cash flows, financial condition, and overall profitability.

35. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company even after the Offer which will allow them to determine the outcome of matters submitted to shareholders for approval.

Following this Offer, our Promoters and members of the Promoter Group will collectively hold [●] % of our post-Offer equity share capital. As a result, they will continue to exercise significant influence over the Company, including the ability to control matters requiring shareholder approval—such as the appointment of directors—subject to the provisions of the Companies Act, 2013 and our Articles of Association. This concentration of ownership may limit the ability of other shareholders to influence corporate decisions and could potentially delay, deter, or prevent a change in control of the Company. Additionally, our Promoters may, at times, take decisions that may not align with the interests of other shareholders or creditors. While such decisions will be made in accordance with applicable laws, we cannot assure that they will not adversely impact our business operations, financial performance, or the market price of our Equity Shares.

36. The average cost of acquisition of Equity Shares by our Promoters is lower than the Offer price.

Our Promoters' average cost of acquisition of Equity Shares in our Company is lower than the Offer Price of the shares

proposed to be offered though this Prospectus. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company, please refer the below mentioned table:

Name of the Promoter	No. of shares held	Average cost of acquisition (in ₹)
Amitendra Singh	46,37,640	(0.80)
Shakti Narayan Singh	3,60,000	1.67

Notes: -

- The average cost of acquisition of Equity Shares has been calculated by taking into account the amount paid by them to acquire Shares allotted to them as reduced by amount received on sell of shares i.e., net of sale consideration is divided by net quantity of absolute shares acquired. The Average Cost of Acquisition (in ₹) which are negative are considered as Nil.

- Average cost of acquisition of Equity Shares is certified by the Peer Review Auditor M/s. S V V S & Associates, Chartered Accountant having September 11, 2026 having UDIN No. 26402618EUGMZF2770.

37. Limited award of projects, reduced client demand, or lack of market acceptance of our services in the infrastructure and construction sector could adversely impact our order book, revenue generation, and overall business performance.

The Company's growth and sustainability depend on its ability to secure new projects and maintain continued demand for its construction and infrastructure services. Factors such as changes in client preferences, evolving project requirements, pricing pressures, increased competition, and shifts in government policies or infrastructure spending may affect the demand for our services. If we are unable to align our capabilities with market expectations, maintain competitive pricing, or deliver projects in line with client requirements, it may adversely impact our ability to win new contracts or retain existing clients.

Further, delays in project execution, inability to meet quality standards, or failure to adapt to new construction technologies and methodologies may reduce client confidence and limit repeat business opportunities. Reduced demand or limited market acceptance of our services could lead to a decline in our order book, restrict opportunities for expansion into new geographies or segments, and adversely affect our revenue generation.

The construction industry is highly competitive, and competitors with greater resources, advanced technologies, or more competitive pricing strategies may gain a larger market share. While we continuously strive to improve our operational efficiency, execution capabilities, and market positioning, there can be no assurance that our services will consistently meet market expectations or maintain strong demand.

Any sustained decline in project awards or market acceptance may adversely impact our revenues, profitability, and growth prospects, and could also affect our reputation and goodwill. We would like to state that, as of the date hereof, we have not experienced any material instances of lack of market acceptance impacting our business.

38. The objects of the Offer, for which we are raising funds, are based on our management's estimates and have not been appraised by any bank, financial institution, or independent agency. The deployment of funds in the project is entirely at our discretion, following the parameters outlined in the chapter titled "Objects of the Offer."

The fund requirements and deployment, as detailed in the "Objects of the Offer" section on page 84 of this Draft Red Herring Prospectus, are based on management's estimates and have not been appraised by any bank, financial institution, or independent agency. These requirements align with our current business plan, which may change due to the competitive and dynamic nature of our industry.

As a result, our business plan and corresponding fund requirements may be revised. The deployment of funds, as stated in the "Objects of the Offer" chapter, is at the discretion of our Board of Directors and is not subject to external monitoring. Furthermore, we cannot guarantee that the actual costs or implementation schedule outlined in the "Objects of the Offer" chapter will not differ from our estimates. Variations may occur due to factors beyond our control. Such events could delay our business plans and adversely affect our expected revenues and earnings.

39. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Offer proceeds may delay the implementation schedule.

Our proposed fund requirements include investment in working capital requirement, as described in the section titled "Objects of the Offer." These are intended to be met from the proceeds of this IPO. Other than this offering, we have not identified any alternate source of funding and any delay or failure to mobilize the required funding or any shortfall in the Offer proceeds may delay the implementation schedule. Further, we cannot provide any assurance that we will be able to execute our plans/strategy within the given timeframe. For details, kindly refer to the chapter titled "Object of the Offer" on page 84.

40. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected. Further, there were no any past instances of employee misconduct, errors or fraud that could adversely affect our business prospects, results of operations and financial condition.

41. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks. Despite our internal control systems, we may be exposed to operational risks, including fraud, petty theft and embezzlement, which may adversely affect our reputation, business, financial condition, results of operations and cash flows.

Effective internal controls are critical for us to maintain accurate financial records, ensure compliance with applicable laws and regulations, and safeguard our assets against fraud and misuse. Given the nature of our construction business, which involves multiple ongoing projects, high-value contracts, and a significant volume of transactions across sites, strong internal control systems are essential for efficient financial reporting and risk management.

However, our internal controls may not always operate effectively or may become inadequate over time due to changes in business scale, project complexity, or operational requirements. We cannot assure that deficiencies in our internal control systems will not arise in the future, or that we will be able to promptly identify, implement, or sustain corrective measures to address such deficiencies.

Any failure to maintain robust internal controls may impair our ability to accurately record project costs, revenues, and financial transactions, and may limit our ability to effectively monitor financial risks or prevent and detect fraud. This could lead to errors in financial reporting, regulatory non-compliance, or financial losses.

Further, due to the involvement of multiple stakeholders—including employees, subcontractors, vendors, and site-level personnel—we may be exposed to risks of fraud, misappropriation of materials, billing irregularities, or other misconduct. Such activities may be difficult to detect, particularly in remote project locations, and may not always be identified in a timely manner.

Additionally, our reliance on internal systems and processes to record and manage financial and operational data may expose us to risks arising from system errors, technical failures, or intentional manipulation. Even where such instances are identified and action is taken, there can be no assurance of full recovery of any losses incurred.

Any such failures, deficiencies, or incidents could adversely affect our reputation, business operations, financial condition, cash flows, and results of operations.

42. We may face a credit risk which may in turn affect our complete buying cycle adversely.

As a construction company, we primarily undertake infrastructure and development projects on a subcontracting basis, being engaged by principal contractors who have been awarded projects by government authorities and other clients. Our core strength lies in our ability to efficiently execute a wide range of construction activities as a subcontractor across various project sites.

Our business is working capital intensive in nature. We are often required to procure construction materials in advance to ensure timely execution of projects and to maintain uninterrupted operations at site locations. In addition, we deploy a significant fleet of machinery, equipment, and manpower, which further increases our working capital requirements.

In the ordinary course of business, and to maintain long-term relationships with principal contractors and remain competitive in securing subcontracting opportunities, we may extend credit periods for our services. As a result, our cash flows are largely dependent on timely payments from our principal contractors, which are in turn linked to payments

received by them from the ultimate project owners, including government authorities.

Any delay or default in payments from our principal contractors may adversely impact our working capital cycle and liquidity position. Such delays could affect our ability to procure materials, meet ongoing operational expenses, and make timely payments to suppliers, subcontractors, and employees.

If such delays persist, they may disrupt project execution, reduce operational efficiency, and affect our ability to undertake new subcontracting assignments. This could adversely impact our business operations, financial condition, and profitability.

43. Our ability to pay dividends in the future will depend on a number of factors, including our profit after tax for the respective fiscal year, our capital requirements, our financial condition, our cash flows and applicable taxes, including payment of dividend distribution tax

The payment of dividends in the future will depend on various factors, including our earnings, financial condition, cash flows, and capital requirements. Also, Board will consider financial/internal parameters and external parameters while declaring dividends as stated in the Dividend Distribution Policy. Our Company has never declared dividends in the past, there is no assurance that dividends will be declared in the near or medium term. Any future declaration of dividends will be at the discretion of our Board of Directors and will depend on a number of considerations, including the need to fund our operations and support future business expansion. For further details, please refer to the section titled "Dividend Policy" on page 217 of this Draft Red Herring Prospectus.

EXTERNAL RISK FACTORS

44. We cannot assure you that our equity shares will be listed on the SME platform of BSE in a timely manner or at all, which may restrict your ability to dispose of the equity shares.

Though we shall make best of our efforts to comply with all applicable regulatory, financial and operational requirements for getting the equity shares proposed to be offered through this Prospectus listed on SME platform of BSE in a time bound manner, yet on account of any change in applicable laws, economic conditions and/or any other reason/s beyond our control, the said shares may not get listed on the SME platform of BSE Limited in a timely manner or at all, which may restrict your ability to dispose of the equity shares. However, even in such circumstances, the company shall stay fully committed to pay such interest and/or refund the full application amount, as may be required in accordance with the applicable regulatory directives.

45. After the listing of the Equity shares of the company, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchange may fluctuate as a result of the factors, including but not limited to:

- Volatility in the Indian and global capital market;
- Company'sresults of operations and financial performance;
- Performance of Company's competitors,
- Adverse media reports on Company or pertaining to our Industry;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developmentsin India's environmental regulations.

Current valuations in our industry, including those implied for our Company, may not be sustainable over time and may not accurately reflect future market conditions. As there has been no prior public market for our Equity Shares, their trading price after this Offer may be volatile and subject to fluctuations. We cannot assure that an active or liquid market for our Equity Shares will develop or continue after the Offer, nor can we guarantee that the initial trading price will be indicative of future market prices.

46. The Offer Price of our Equity Shares may not reflect their market price following the Offer. After listing, the market price may fluctuate and could fall below the Offer Price. As a result, investors may not be able to sell their Equity Shares at or above the Offer Price.

The Offer Price of our Equity Shares has been determined through the book building process and is based on numerous

factors (for further details, see the chapter titled "Basis for Offer Price" beginning on page 115 of this Draft Red Herring Prospectus). However, this price may not be indicative of the market price of our Equity Shares following the Offer.

After listing, the market price of our Equity Shares may be volatile and subject to significant fluctuations, and could decline below the Offer Price. Accordingly, we cannot assure that investors will be able to sell their Equity Shares at or above the Offer Price.

The market price of our Equity Shares may be influenced by a variety of factors, including but not limited to:

- Variations in our financial performance, including changes in earnings per share, net income, and revenues (including on a half-yearly basis);
- Changes in analysts' estimates of our financial performance or the publication of research reports about us or our industry;
- Speculation or commentary in the media or investment community;
- Overall market conditions; and
- Domestic and international economic, legal, and regulatory developments that are not directly related to our performance.

47. If the equity shares of the company are sold by our Promoters or other significant shareholder(s). it may adversely affect the trading price of the Equity Shares.

Any sale or proposed sale of Equity Shares by our Promoters or other significant shareholders may have an adverse effect on the trading price of our Equity Shares. Such transactions, or even the perception that such sales may occur, could create an overhang in the market and increase the supply of our Equity Shares, which may lead to a decline in their market price.

In addition, actual or anticipated disinvestments by our Promoters or significant shareholders may be interpreted by the market as a lack of confidence in our future prospects, which could further negatively impact investor sentiment and the trading price of our Equity Shares. We cannot assure that any such sales, or the expectation of such sales, will not materially and adversely affect the market price of our Equity Shares.

48. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.

Our Equity Shares, once listed, will be subject to daily price limits (commonly referred to as "circuit breakers") imposed by the Stock Exchanges. These limits restrict trading in the Equity Shares beyond a specified percentage movement in either direction during a trading day and operate independently of the broader, index-based circuit breakers implemented by Securities and Exchange Board of India on Indian stock exchanges.

The applicable circuit breaker limits for our Equity Shares will be determined by the Stock Exchanges based on factors such as historical price volatility and trading volumes. The Stock Exchanges are not required to notify us of these limits and may revise them from time to time without prior notice.

While these mechanisms are intended to curb excessive volatility, they may also restrict the ability of the market price of our Equity Shares to move freely, both upward and downward, within a trading day. As a result, shareholders may face limitations in buying or selling Equity Shares at desired prices or times, and we cannot assure that shareholders will be able to sell their Equity Shares at a particular price or without delay.

49. A portion of the Net Proceeds of the Offer is proposed to be utilised towards general corporate purposes, which constitutes [●]% of the Net Proceeds of the Offer.

The proposed utilisation towards general corporate purposes provides us with flexibility to deploy such funds for purposes permitted under applicable laws and as may be determined by our Company. However, our ability to utilise the amount earmarked for general corporate purposes may be subject to applicable laws, regulations, approvals and other restrictions governing the utilisation of the Net Proceeds.

In the event that we are unable to utilise the portion of the Net Proceeds earmarked for general corporate purposes, or are otherwise restricted from deploying such funds towards our intended purposes, we may not be able to deploy such funds in a timely manner. Further, any delay or restriction in the utilisation of such funds may limit our flexibility in responding to our business requirements and changing business or financial conditions. Such circumstances could have an adverse effect on our business, results of operations, cash flows and financial condition.

50. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares. Bottom of Form

Any future issuance of Equity Shares, or securities convertible into or linked to Equity Shares, by our Company may dilute existing shareholdings and could adversely affect the market price of our Equity Shares. Such issuances may also impact our ability to raise additional capital on favourable terms. Further, even the perception among investors that such issuances may occur could negatively influence the trading price of our Equity Shares. We cannot assure that we will not undertake any such issuances in the future.

In addition, any sale, or the possibility of a sale, of Equity Shares by our Promoters or members of our Promoter Group may have a significant adverse effect on the trading price of our Equity Shares. We cannot assure that our Promoters or Promoter Group will not dispose of, pledge, or otherwise encumber their Equity Shares in the future, and any such actions, or the perception thereof, could adversely impact investor sentiment and the market price of our Equity Shares.

51. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are subject to extensive regulation by various laws, rules, and policies enacted by the Central and State Governments. These regulations may be amended, modified, or reinterpreted at short notice and at the discretion of the relevant authorities.

Any failure on our part to comply with applicable laws and regulations, or any adverse changes in such regulations or their interpretation and enforcement, may result in increased compliance costs, penalties, or other regulatory actions. This could disrupt our operations and have a material adverse effect on our business, financial condition, and results of operations.

52. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied on equity shares sold on an Indian stock exchange. Any capital gain exceeding ₹125,000, realized on the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long-term capital gains in India at the rate of 12.50% (plus applicable surcharge and cess). Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of Securities Transaction Tax ("STT"), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Furthermore, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short-term capital gains tax in India at the rate of 20% (plus applicable surcharge and cess), subject to STT being paid at the time of sale of such shares. Otherwise, such gains will be taxed at the applicable rates. Furthermore, any gain realized on the sale of Equity Shares held for more than 12 months, which are sold using any platform other than a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India at the rate of 12.5% (plus applicable surcharge and cess).

Under the Finance Act 2020, any dividends paid by an Indian company will be subject to tax in the hands of the shareholders at applicable rates. Such taxes will be withheld by the Indian company paying dividends. These taxes will be deducted by the Indian company making the distribution. Non-resident shareholders may be eligible to claim benefits under an applicable tax treaty, subject to fulfillment of specified conditions and procedural requirement. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

Further, the Government of India announced the union budget for Fiscal 2027 following which the Finance Bill, 2026 ("Finance Bill") was introduced in the Lok Sabha on February 1, 2026 which proposes to introduce certain changes including in respect of reduction of rate of minimum alternate tax, shifting from old to new regime for minimum alternate tax credit, reduction of rates of tax collected at source and taxation of consideration received on buy-back of shares as capital gains. The Finance Bill will be enacted once it is passed by the Indian Parliament and receives the President's assent. Additionally, the Income Tax Act, 2025 ("ITA 2025") received the assent from President of India on August 21, 2025, and will become effective from April 1, 2026. While the Government has stated that ITA 2025 does not introduce any policy changes and has primarily been enacted as a simplified, concise, and reader-friendly legislation, we cannot predict whether if the enactment of the ITA 2025 or any interpretational issue arising therefrom will have a bearing on our business, financial condition, cash flows, and results of operations or on the industry in which we operate would have an adverse effect on our business, results of operations, financial condition and cash flows. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply

for additional approvals.

53. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include custom duties on imports of raw materials and components, Goods and Service. These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase inany of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition

54. The availability, quality, and reliability of infrastructure in India may have a significant impact on our business operations. Inadequate infrastructure, including transportation networks, power supply, logistics systems, and telecommunications, could lead to delays in project execution, increased operating costs, and disruptions in our supply chain.

India's physical infrastructure is still in a developing stage compared to many developed economies. As a result, any congestion, delays, or disruptions in key infrastructure systems such as ports, railways, road networks, electricity supply, telecommunications, or other public utilities could adversely affect our normal business operations.

Any deterioration or inefficiency in such infrastructure may also have a broader impact on the national economy by disrupting the movement of goods and services and increasing the overall cost of doing business in India.

These challenges could lead to delays in project execution, increased operational costs, and interruptions in our business activities, which may, in turn, have a material adverse effect on our results of operations and financial condition.

55. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has historically exercised, and continues to exercise, significant influence over various aspects of the Indian economy. As a result, our business, as well as the market price and liquidity of our Equity Shares, may be affected by changes in governmental policies and actions. These may include, among others, changes in interest rates, taxation policies, fiscal and monetary measures, and regulations governing trade, investment, and the information technology sector.

In addition, broader political, economic, and social developments in India—such as political instability, social or civil unrest, or shifts in economic priorities—may also have an impact on our operations and on investor sentiment in the Indian capital markets.

India has undergone significant economic liberalisation in recent decades; however, there can be no assurance that such liberalisation policies will continue in the same manner or at the same pace. Any slowdown, reversal, or modification of these policies, including changes affecting foreign investment, the technology sector, or capital markets, could adversely affect the overall business and economic environment in India.

Any such developments may have a material adverse effect on our business, prospects, financial condition, results of operations, and the market price and liquidity of our Equity Shares.

56. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.

The facts, figures, and other statistical information relating to India, the Indian economy, and the industry in which we operate included in this Prospectus have been sourced from publicly available materials, including websites such as the IBEF, which we believe to be reliable. However, we do not independently verify the accuracy or completeness of such third-party information and cannot guarantee its reliability.

While we have exercised reasonable care in reproducing such information, neither we nor our respective affiliates, advisors, or intermediaries have independently verified these industry-related facts and statistics. Accordingly, we make no representation or warranty regarding their accuracy, adequacy, or completeness.

Certain of this information is also included in the chapter titled "Industry Overview" beginning on page 128 of this Draft Red Herring Prospectus. Due to potential limitations in data collection methodologies, differences in reporting standards, or variations between published data and actual market practices, the statistics presented herein may not be fully accurate,

may differ from statistics published elsewhere, and may not be directly comparable with other sources.

As a result, such information should not be unduly relied upon, and there can be no assurance that it has been prepared or compiled on a consistent basis or with the same level of accuracy as similar data presented in other reports or publications.

57. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other countries, as well as acts of violence, terrorism, civil unrest, or similar events that are beyond our control, could have a material adverse effect on the Indian economy and, in turn, our business. Such events, whether occurring in India or internationally—including incidents in countries such as the United States, Russia, Ukraine, Iran, the United Kingdom (London), and elsewhere—may impact global financial stability and investor confidence.

These developments could adversely affect both Indian and global equity markets, including the stock exchanges on which our Equity Shares will be listed and traded. They may also negatively influence business sentiment, cross-border trade, and overall economic activity.

As a result, such events could have a material adverse effect on our business operations, profitability, financial condition, and the market for securities of Indian companies, including our Equity Shares.

58. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Our business is influenced by global and domestic economic and political conditions that are beyond our control, and which can affect industry demand, project execution, and financial performance. These factors include, among others, interest rates, economic growth rates, government fiscal and monetary policies, inflation or deflation trends, foreign exchange fluctuations, availability of credit, commodity price movements (including key construction materials), levels of consumer and business debt, and employment trends. Broader shifts in these conditions also impact overall business confidence, infrastructure spending, and investment activity, which are critical drivers for the construction sector.

In addition, increasing volatility in global financial markets may lead to more frequent and sharper changes in these macroeconomic factors. Any such developments could adversely affect market sentiment and may result in fluctuations in the trading price of our Equity Shares, as well as have a material adverse effect on our business, financial condition, and results of operations.

59. Inflationary pressures may increase project costs and adversely affect our profitability and financial condition

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. The country has also experienced periods of high inflation, which can significantly impact overall economic conditions and input costs across industries, including construction.

Increases in inflation may lead to higher interest rates and rising costs of key inputs required for our business, including raw materials, labour, fuel, logistics, and other operating expenses. Given the nature of the construction industry, where projects are often executed over extended periods, such cost escalations may be difficult to predict or fully control.

High fluctuations in inflation may therefore make it more challenging for us to accurately estimate project costs and maintain margins. In certain cases, we may not be able to pass on increased costs to our customers in full or in part, particularly where contracts are fixed-price in nature or subject to competitive bidding. As a result, our profitability, cash flows, and financial condition could be adversely affected.

While the Government of India has implemented various measures in the past to manage inflation, there can be no assurance that such measures will continue, remain effective, or prevent future increases in inflation levels. Any sustained or further rise in inflation in India could have a material adverse effect on our business, results of operations, and financial condition.

60. Any downgrade in India's sovereign credit rating by an independent rating agency may negatively impact overall investor confidence in the country's financial markets. This could lead to higher borrowing costs and reduced availability of credit across the economy.

Any adverse revision to India's credit ratings for domestic or international debt by global rating agencies may negatively affect overall investor confidence and capital flows into the country. This, in turn, could impact the availability and cost of financing for Indian companies, including our Company.

As a result, we may face difficulties in raising additional funds, or such financing may only be available at higher interest rates or on less favourable commercial terms. This could increase our financing costs, constrain our ability to fund capital expenditures and growth initiatives, and ultimately have a material adverse effect on our business, financial condition, future performance, and the trading price of our Equity Shares.

61. Our business may be adversely affected by natural calamities impacting infrastructure and project sites

Our country has experienced various natural calamities such as earthquakes, tsunamis, floods, and other extreme weather events. The frequency and severity of such events can significantly influence their overall impact on the economy.

Prolonged periods of abnormal rainfall or the occurrence of other natural disasters may adversely affect economic activity, disrupt infrastructure and supply chains, and slow down project execution across sectors, including construction. Such events could therefore have a material adverse effect on our business operations, prospects, financial condition, and results of operations, and may also negatively impact the market price of our Equity Shares.

62. Foreign investment in India is subject to various regulatory restrictions under applicable laws. These regulations may limit the extent to which foreign investors can invest in or hold Equity Shares of our Company. As a result, our ability to attract foreign investment may be constrained, which could impact the demand for our Equity Shares in the market.

Under the foreign exchange regulations currently in force in India, transfers of Equity Shares between residents and non-residents are generally permitted, subject to certain conditions. These include compliance with pricing guidelines and reporting requirements prescribed by the Reserve Bank of India. However, if any proposed transfer does not comply with the applicable pricing norms, reporting obligations, or falls within specified exceptions under the regulations, prior approval from the Reserve Bank of India may be required.

In addition, shareholders who intend to convert proceeds from the sale of Equity Shares in India into foreign currency and repatriate such funds outside India may be required to obtain a no-objection certificate or tax clearance from the relevant income tax authorities.

There can be no assurance that any approvals required from the Reserve Bank of India or other governmental or regulatory authorities will be granted in a timely manner, on favourable terms, or at all. Any delay or inability to obtain such approvals could restrict transfers or repatriation of funds and may adversely affect liquidity in our Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalize the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

As at August 31, 2026, the amount outstanding under our secured borrowings was ₹ 1,872.08 Lakhs. The Company proposes to repay / prepay certain outstanding borrowings availed by the Company, in full or in part, from the Net Proceeds of the Offer, as may be specified in the Offer Documents.

We confirm that the information contained in this certificate is true, fair, correct and complete, and is not misleading in any material respect, based on the records and information made available to us for the purpose of this certificate.

We have conducted our examination of the information given in this certificate (including Annexure A) in accordance with the "Guidance Note on Reports or Certificates for Special Purposes (Revised 2016)" issued by the Institute of Chartered Accountants of India ("ICAI"), as revised from time to time, to obtain reasonable assurance that such details are in agreement with the books of account and other relevant records provided to us, in all material respects. Further, the repayment and/or prepayment of borrowings may result in a reduction in our debt-equity ratio. The extent to which our debt-equity ratio may improve will depend on, among other factors, the amount of borrowings repaid and/or prepaid and our financial position at the relevant time. In addition, we believe that since our debt-equity ratio will improve, it will enable us to raise further resources at competitive rates and additional funds or capital in the future to fund potential business development opportunities and plans to grow and expand our business in the future. Given the nature of these borrowings and the terms of repayment/prepayment, the aggregate outstanding borrowing amounts may vary from time to time. Accordingly, at the time of filing of the Red Herring Prospectus, the details set out below shall be suitably updated to reflect the revised amounts and/or loans, as applicable, availed by our Company. If, prior to the filing of the Red Herring Prospectus, any of the borrowings identified below are repaid, prepaid or refinanced, or if any additional credit facilities are availed or drawn down, or further disbursements are made under existing facilities, our Company may, subject to applicable laws and the terms of the relevant borrowing arrangements, utilise the Net Proceeds towards repayment and/or prepayment of such refinanced facilities, additional facilities and/or further disbursements.

GLOBAL ECONOMY

Under the reference forecast, global growth is projected to be 3.1 percent in 2026 and 3.2 percent in 2027, slower than its recent pace of about 3.4 percent in 2024–25, and to settle at about that rate in the medium term, slower than its historical (2000–19) average of 3.7 percent. The forecast for 2026 is revised downward by 0.2 percentage point and that for 2027 is unchanged, compared with those in the January 2026 WEO Update. Global headline inflation is expected to increase to 4.4 percent in 2026 and decline to 3.7 percent in 2027, marking upward revisions for both years.

Absent the war, global growth would have been revised upward. Indeed, forecasts based on pre-conflict assumptions would have shown a slight upward revision of 2026 growth relative to that forecasted in the January WEO Update, by 0.1 percentage point to 3.4 percent. Hence, the downward revision for 2026 largely reflects the disruptions from the conflict in the Middle East, partly offset by carryover from recent strong data and reduced tariff rates.

Crucially, there is a high degree of cross-country dispersion in the reference forecast. While the growth and inflation revisions seem relatively modest at the global level, the toll on the conflict region and more vulnerable economies elsewhere—in particular, commodity-importing emerging market and developing economies with pre-existing fragilities—is much more pronounced. The downward revision to growth in emerging market and developing economies is 0.3 percentage point for 2026, relative to that in the January WEO Update, while the forecast is broadly unchanged for advanced economies.

Under an adverse scenario with larger and more persistent increases in energy prices, global growth would slow further to 2.5 percent in 2026, and inflation would reach 5.4 percent. Under a more severe scenario in which there is more damage to energy infrastructure in the conflict region, the impact would be even larger: Global growth would be cut to only about 2 percent in 2026, while headline inflation would be just above 6 percent by 2027. The impact on emerging market and developing economies would be almost twice that on advanced economies.

At current prices, Nominal GDP is projected to reach Rs. 357.14 lakh crore (US$ 3.96 trillion) in FY 2025–26, from Rs. 330.68 lakh crore (US$ 3.98 trillion) in the previous year, registering a growth of 8.0%. On the production side, Real Gross Value Added (GVA) is estimated at Rs. 184.50 lakh crore (US$ 2.04 trillion), up from Rs. 171.87 lakh crore (US$ 2.07 trillion) in FY 2024–25, indicating a growth of 7.3%, while Nominal GVA is expected to expand to Rs. 323.48 lakh crore (US$ 3.59 trillion) from Rs. 300.22 lakh crore (US$ 3.62 trillion), marking a growth of 7.7%. Collectively, these trends highlight India's position as one of the fastest-growing major economies, supported by broad-based expansion across sectors.

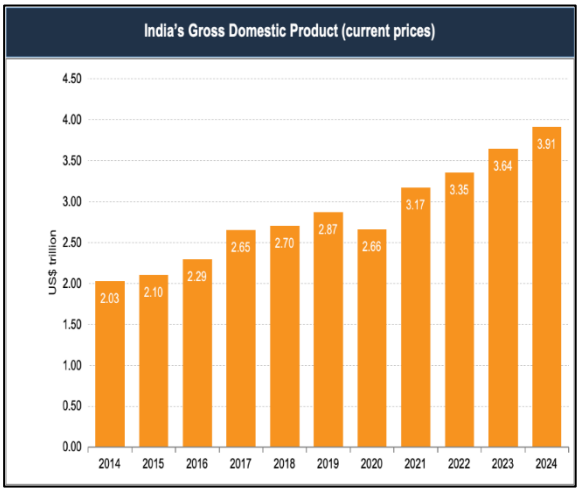

Further, India is projected to reach a GDP of Rs. 4,26,45,000 crore (US$ 5 trillion) by 2027 and is on course to surpass Germany by 2028. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

MARKET SIZE

India is home to 126 unicorns, with six new startups achieving unicorn status in 2025.

India's current account deficit moderated in Q2 FY 2025–26 (July–September), supported by a lower merchandise trade deficit. The deficit stood at Rs. 1.02 lakh crore (US$ 11.7 billion), or 1.3% of GDP, compared with Rs. 1.73 lakh crore (US$ 20.8 billion), or 2.2% of GDP, in the same quarter last year.

In the preceding quarter, the current account had recorded a relatively modest deficit of Rs. 0.20 lakh crore (US$ 2.33 billion), equivalent to 0.2% of GDP, indicating improved external sector resilience. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With India's economy showing resilient growth, supported by strong domestic demand, policy reforms, and a healthy investment pipeline, several new projects and developments are underway across key sectors. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- On the FDI front, according to the Department for Promotion of Industry and Internal Trade (DPIIT), India's cumulative FDI inflow stood at Rs. 99,08,749 crore (US$ 1.12 trillion) between April 2000-September 2025; with major share of FDI equity inflow, coming from Singapore at Rs. 13,21,127 crore (US$ 186.82 billion) with a total share of 24.45%, followed by Mauritius at Rs. 11,22,807 crore (US$ 183.66 billion) with 24.04%, the USA at Rs. 5,50,450 crore (US$ 77.27 billion) with 10.11%, the Netherlands at Rs. 3,77,094 crore (US$ 54.93 billion) with 7.19%, and Japan at Rs. 2,93,863 crore (US$ 45.61 billion) with 5.97%.

- As of January 9, 2026, India's foreign exchange reserves stood at Rs. 61,95,896 crore (US$ 687.19 billion).

- In November 2025, India recorded 113 Private Equity (PE)–Venture Capital (VC) deals valued at Rs. 46,500 crore (US$ 5.6 billion), marking a 31% year-on-year increase from Rs. 35,700 crore (US$ 4.3 billion) in November 2024.

On a month-on-month basis, investment value rose by 4% compared to Rs. 44,800 crore (US$ 5.4 billion) in October 2025. Deal activity also strengthened, with the number of transactions increasing 12% year-on-year from 101 deals in November 2024 and 4% month-on-month from 109 deals in October 2025, reflecting sustained momentum in India's PE/VC investment landscape.

- During FY 2025–26 (up to January 27, 2026), Foreign Portfolio Investor (FPI) activity in India indicated a phase of portfolio optimisation and asset reallocation amid evolving global market conditions. While foreign investors moderated direct equity exposure, debt instruments continued to attract investments of over Rs. 2,100 crore (US$ 0.25 billion), supported by stable macroeconomic fundamentals and policy continuity. FPIs also channelled Rs. 17,025 crore (US$ 2.0 billion) into mutual fund schemes, reflecting a preference for diversified and professionally managed market exposure. Domestic Institutional Investors (DIIs) played a stabilising role in the equity cash market during FY 2025–26 (April–December 2025), recording net purchases of around Rs. 5.99 lakh crore (US$ 66.55 billion). Strong and consistent buying by mutual funds, insurance companies, and pension funds helped offset periods of foreign portfolio moderation.

- India's manufacturing sector continued to expand in December, with the seasonally adjusted HSBC India Manufacturing Purchasing Managers' Index (PMI) remaining firmly in expansionary territory at 55.0, despite easing from 56.6 in November. Importantly, the index stayed above its long-run average, indicating sustained improvement in overall sector health. New orders continued to rise at a strong pace, supported by steady domestic demand, while output growth, although moderating, reflected ongoing capacity utilisation.

- India's consumer price inflation remained subdued and well-anchored in December 2025, reflecting a stable price environment across the economy. Headline inflation, based on the All-India Consumer Price Index (CPI), stood at 1.33% year-on-year, indicating continued moderation in price pressures. The marginal month-on-month uptick of 62 basis points from November 2025 reflects normal seasonal movements, while overall inflation remained comfortably low, underscoring effective supply management and macroeconomic stability.

- India's GST collections continued to demonstrate underlying revenue resilience, supported by steady economic activity and compliance levels. Total Net GST revenue in December 2025 stood at Rs. 1.45 lakh crore (US$ 16.17 billion), reflecting normal month-on-month variation. On a cumulative basis, net yearly GST collections in December 2025 reached Rs. 14.25 lakh crore (US$ 163.59 billion), registering a year-on-year growth of 6.8%, underscoring sustained consumption momentum and the strengthening tax base.

- Passengers carried by domestic airlines during January-November 2025 were 1526.35 lakhs as against 1464.02 lakhs during the corresponding period of the previous year, thereby registering an annual growth of 4.26% and a monthly growth of 6.92%.

- The government is focusing on renewable energy sources and has achieved a major clean energy milestone by generating 50% of its power from renewable sources, five years ahead of its 2030 target. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

- India secured 38th position out of 139 economies in the Global Innovation Index 2025. India rose from 81st position in 2015 to 38th position in 2024. India ranks in 3rd position in the global number of scientific publications.

- India's industrial activity witnessed a strong rebound in November 2025, with the Index of Industrial Production (IIP) growing by 6.7%, a sharp improvement from 0.4% in October 2025, indicating accelerating industrial momentum. The manufacturing sector led this expansion with a robust 8.0% growth, supported by positive performance across 20 out of 23 industry groups at the NIC two-digit level, reflecting a broad-based recovery. Key growth drivers included basic metals (10.2%), pharmaceuticals and medicinal products (10.5%), and motor vehicles and trailers (11.9%), highlighting strength in core, healthcare, and mobility-related industries. Overall, the IIP index rose to 158.0, up from 148.1 in November 2024, underscoring sustained expansion in India's industrial base.

- The government has set a calibrated wheat procurement target of 30 million tonnes for the 2025–26 rabi marketing season, ensuring efficient stock management and smooth market operations. This comes even as wheat production is projected at a record 115 million tonnes in 2024–25, reflecting strong output prospects. To support farmers, the MSP for wheat has been fixed at Rs. 2,425 per quintal, with procurement to be undertaken by FCI and state agencies to meet food security and welfare requirements.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian

government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- Under the Startup India initiative, the Government continues to strengthen the start-up ecosystem through targeted funding, seed support, and credit guarantees. As of October 2025, women-led start-ups received investments and financial support of over Rs. 3,157 crore (US$ 0.38 billion) through the Fund of Funds for Startups, Startup India Seed Fund Scheme, and Credit Guarantee Scheme, reinforcing inclusive entrepreneurship and early-stage innovation across sectors.

- The Ministry of Labour & Employment signed an MoU with Zomato on October 14, 2025, to enhance employment opportunities through the National Career Service (NCS) portal. Under the agreement, Zomato will list around 2.5 lakh job opportunities annually, supporting the growth of the gig economy and promoting formal, technology-enabled livelihoods across India.

- The Production Linked Incentive (PLI) programme has significantly strengthened India’s manufacturing base and export capabilities across priority sectors. As of September 2025, realised investments under PLI schemes stood at Rs. 2,00,000 crore (US$ 24.2 billion) across 14 sectors, leading to incremental production and sales exceeding Rs. 18,70,000 crore (US$ 226.5 billion) and generating over 12.6 lakh jobs (direct and indirect).

- In August 2025, Prime Minister Mr. Narendra Modi launched two major agriculture schemes worth Rs. 35,440 crore (US$ 4 billion), the PM Dhan-Dhaanya Krishi Yojana and the Mission for Aatmanirbharta in Pulses, aimed at boosting self-reliance, productivity, and farmers’ income. He also inaugurated and laid foundation stones for projects worth over Rs. 6,200 crore (US$ 709 million) across agriculture, animal husbandry, fisheries, and food processing sectors.

- On July 5, 2025, the Union Cabinet approved the Rs. 1,00,000 crore (US$ 11.72 billion) Research, Development and Innovation (RDI) Scheme, launching long-term, low- or zero-interest funding via a special purpose fund under the ANRF to jump-start India’s R&D ecosystem and support deep-tech and startup innovation.

- In March 2025, the Government announced several measures to boost industrial growth and investments, including initiatives such as Make in India, Start-up India, PM GatiShakti, and Production Linked Incentive (PLI) Schemes. The Cabinet Committee on Economic Affairs also approved 12 new projects worth Rs. 28,602 crore (US$ 325.02 million) under the National Industrial Corridor Development Programme (NICDP), spanning 10 states, to strengthen India’s manufacturing base and attract investments.

- On March 27, 2025, the Reserve Bank of India proposed doubling the investment cap for individual foreign investors in listed firms from 5% to 10%, with a combined foreign individual limit increasing to 24%, to counter Foreign Portfolio Investment (FPI) outflows.

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.

- The National e-Governance Division (NeGD) and the Indian Ports Association (IPA) signed an MoU on December 24, 2024, to drive digital transformation in India’s maritime sector. The partnership focuses on system integration, software development, and the use of emerging technologies to enhance efficiency and modernise port operations.

- In July 2024, the Ministry of Finance held the Union Budget and announced that for 2024-25, the total receipts other than borrowings and the total expenditure are estimated at Rs. 32.07 lakh crore (US$ 383.93 billion) and Rs. 48.21 lakh crore (US$ 577.16 billion), respectively.

- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US$ 133.27 billion).

- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.

ROAD AHEAD

India's economic outlook remains robust, supported by strong macroeconomic fundamentals, resilient domestic demand, and sustained investment momentum. With Real GDP growth estimated at 7.4% in FY 2025–26, India continues to rank among the fastest-growing major economies globally, underpinned by broad-based expansion across manufacturing, services, and infrastructure.

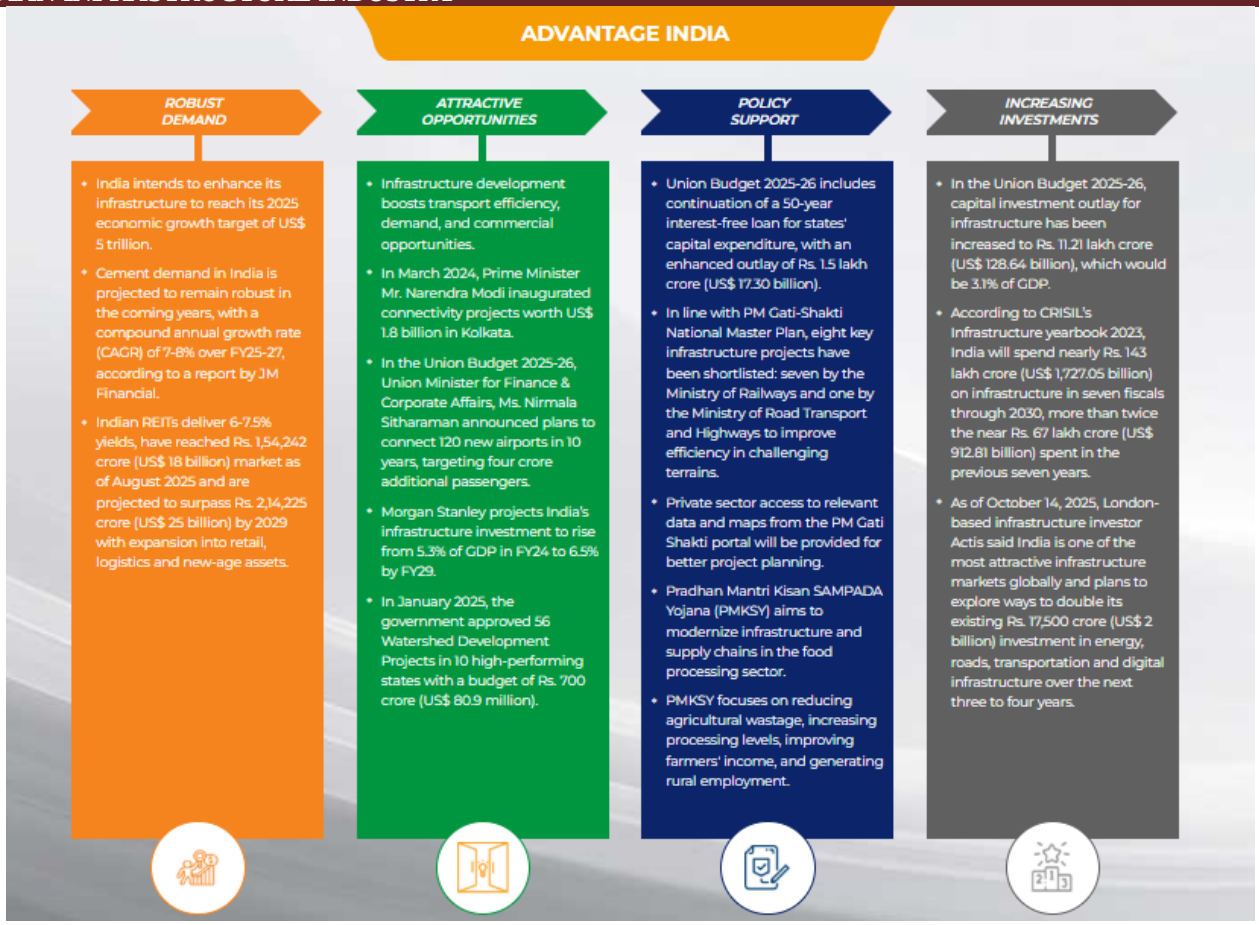

A stable external position, reflected in foreign exchange reserves of Rs. 61.96 lakh crore (US$ 687.19 billion), along with steady foreign capital inflows through FDI, PE–VC investments, and debt instruments, reinforces confidence in India's long-term growth trajectory.

Domestic demand remains a key anchor, supported by subdued inflation, rising air passenger traffic, resilient GST collections, and strong DII participation in capital markets. Manufacturing activity continues to expand, with PMI remaining firmly in expansionary territory and IIP growth accelerating, while the government's focus on renewable energy, innovation, and food security further strengthens structural growth drivers. Collectively, these trends position India favourably to sustain economic momentum, deepen capital formation, and enhance its role as a global growth engine in the years ahead.

INDIAN INFRASTRUCTURE INDUSTRY

INTRODUCTION

Infrastructure is a key enabler in helping India become a US$ 26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Mr. Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors.

The government's focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway.

Infrastructure support to the nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

The infrastructure sector is a key driver of the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from the

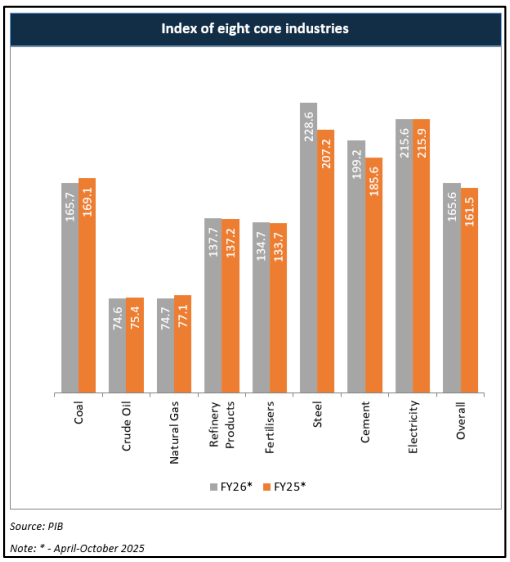

Government for initiating policies that would ensure the time-bound creation of world-class infrastructure in the country. The infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India's economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure, and construction development projects.

To meet India's aim of reaching a US$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as 'Make in India' and the production-linked incentives (PLI) scheme to augment the growth of the infrastructure sector. Historically, more than 80% of the country's infrastructure spending has gone toward funding for transportation, electricity, and water, and irrigation.

While these sectors still remain the key focus, the government has also started to focus on other sectors as India's environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

MARKET SIZE

Starting with 6,835 projects, the NIP project count now stands at 9,142 covering 34 sub-sectors, as per news reports. Under the initiative, 2476 projects are under the development phase with an estimated investment of US$ 1.9 trillion. Nearly half of the under-development projects are in the transportation sector, and 3,906 are in the roads and bridges sub-sector.
Around 3,500 projects with investment of Rs. 25,00,000 crore (US$ 292 billion) added to NIP during FY25.

ROAD AHEAD

With a 37% increase in the current fiscal year, capital expenditures (CAPEX) are on the rise, which bolsters ongoing infrastructure development and fits with 2027 goals for India's economic growth to become a US$ 5 trillion economy. In order to anticipate private sector investment and to address employment and consumption in rural India, the budget places a strong emphasis on the development of roads, shipping, and railways.

Global investment and partnerships in infrastructure, such as the India-Japan forum for development in the Northeast are also indicative of more investments. These initiatives come at a momentous juncture as the country aims for self-reliance in future-ready and sustainable critical infrastructure.

India, it is estimated, needs to invest US$ 840 billion over the next 15 years into urban infrastructure to meet the needs of its fast-growing population. This investment will only be rational as well as sustainable, if we additionally focus on long-term maintenance and strength of our buildings, bridges, ports, and airports.

As a result of digitalisation and opportunities that tier II and III cities present for economic growth, the divide between metro and non-metros is blurring, moving to the new era of infrastructure growth. Commercial real estate properties have witnessed exponential growth in demand across Tier II & III cities as Information technology and Information technology enabled services and banking financial services and insurance focused organizations are increasingly decentralizing their operations to adapt to the new normal.

Civil Aviation Ministry's "Vision 2040" report states that there will be 190-200 functioning airports in India by 2040. Delhi and Mumbai will have three international airports each, while top 31 Indian cities will have two operational airports each.
220 destinations (airports/heliports/water aerodromes) under UDAN are targeted to be completed by 2026 with 1000 routes to provide air connectivity to unconnected destinations in India.

India's Infrastructure forms an integral part of the country's economic ecosystem. There has been a significant shift in the industry that is leading to the development of world-class facilities across the country in the areas of roads, waterways, railways, airports, and ports, among others. The country-wide smart cities programmes have proven to be industry game-changers. Given its critical role in the growth of the nation, the infrastructure sector has experienced a tremendous boom because of India's necessity and desire for rapid development. The expansion has been aided by urbanisation and an increase in foreign investment in the sector.

The infrastructure sector has become the biggest focus area for the Government of India. India's GDP is expected to grow exponentially over the next three fiscal years, with one of the quickest rates among major, developing economies, according to S&P Global Ratings. India and Japan have joined hands for infrastructure development in India's Northeast states and are also setting up an India-Japan Coordination Forum for development of Northeast to undertake strategic infrastructure projects for the region.

India being a developing nation is set to take full advantage of the opportunity for the expansion of the infrastructure sector, and it is reasonable to conclude that India's infrastructure has a bright future ahead of it.

OUR SERVICE

Integrated Water Supply Project Execution Process

We are primarily engaged in providing services related to water treatment plants and undertake all ancillary activities associated with the supply of potable water to households. Our scope of work includes end-to-end execution of water supply infrastructure, from raw water abstraction to final distribution. In carrying out these operations.

Flowchart of Integrated Water Supply Project Execution

The Process flow of our Integrated Water Supply Project Execution is described below:

- ***Identification and Assessment of Water Source***

  The process generally commences with the identification of a suitable and sustainable water source, including rivers, lakes, reservoirs or groundwater. Technical assessments are undertaken to evaluate water availability, yield capacity, seasonal variations and raw water quality parameters. Such evaluation also includes consideration of demand projections and long-term sustainability of the source. Environmental and regulatory aspects are reviewed as part of the assessment process. The selection of the source is carried out in accordance with project requirements and subject to obtaining necessary approvals, permissions and clearances from relevant authorities.

- ***Design and Development of Intake Infrastructure***

  Based on the identified source, intake structures, including intake wells or related systems, are designed and constructed to facilitate abstraction of raw water. The design takes into account site-specific factors such as water levels, flow conditions, sediment load and flood levels. Screening arrangements are incorporated to restrict the entry of floating materials and debris. Pumping systems and electromechanical equipment are installed for regulated extraction of water. The construction of intake infrastructure is carried out in accordance with approved engineering designs and project specifications.

- ***Raw Water Abstraction and Transmission System***

  Raw water is abstracted through the intake infrastructure and conveyed to the Water Treatment Plant ("WTP") through transmission pipelines developed as part of the project. The pipeline network is designed based on hydraulic parameters, terrain conditions and distance considerations. Materials used depending on project requirements. Pumping stations, valves and related components are installed to facilitate conveyance of water. The system is operated to maintain required flow levels and continuity of supply to the treatment facility.

- ***Construction and Establishment of Water Treatment Plant (WTP)***

  The Company undertakes the construction and commissioning of the Water Treatment Plant, which forms the central component of the water supply system. The scope includes development of civil structures, installation of mechanical and electrical equipment, and provision of instrumentation systems. Ancillary facilities such as filter houses, chlorination units, chemical dosing systems and clear water reservoirs are also established. The plant is developed in accordance with technical designs, raw water characteristics and applicable engineering standards. Commissioning activities are undertaken upon completion of installation works.

- ***Preliminary Treatment Processes***

  At the Water Treatment Plant, raw water is initially subjected to preliminary treatment processes such as coagulation and flocculation. Chemical coagulants are added to facilitate aggregation of suspended particles. The water is then directed to sedimentation units, where heavier particles settle under gravity. These processes contribute to reduction of turbidity, colour and suspended solids. The treatment sequence is carried out using standard methodologies adopted in water treatment systems. The output from this stage is prepared for subsequent filtration.

- ***Filtration Process***

  Following preliminary treatment, water is passed through filtration systems located in the filter house. These systems

may include rapid sand filters, pressure filters or other filtration media depending on project design. The filtration process facilitates removal of finer suspended particles and residual impurities. Periodic cleaning or backwashing of filters is carried out as part of operational requirements. This stage contributes to improvement in water clarity and physical quality prior to disinfection.

- ***Disinfection through Chlorination***

  The filtered water is subjected to disinfection through chlorination in designated chlorination units. Chlorine dosing systems are installed to introduce controlled quantities of disinfectant into the water. This process is carried out to address microbiological contaminants. Residual chlorine levels are maintained in accordance with applicable standards and monitored periodically. The chlorination process is undertaken prior to storage and distribution of treated water.

- ***pH Adjustment and Chemical Conditioning***

  The treated water is further subjected to pH adjustment and chemical conditioning processes, as may be required, to align with prescribed drinking water standards. Chemicals may be added in controlled quantities to stabilize water characteristics. Monitoring of parameters such as pH and other chemical indicators is carried out during this stage. Laboratory testing and instrumentation may be used for verification purposes. This step is undertaken prior to storage and distribution of water.

- ***Storage of Treated Water***

  Treated water is stored in clear water reservoirs, overhead tanks (OHTs) developed as part of the project infrastructure. These storage facilities are designed based on demand patterns, storage capacity requirements and project specifications. The stored water serves as a buffer between treatment and distribution stages. Storage infrastructure is constructed in accordance with engineering designs and operational requirements. Water is retained in such facilities prior to distribution.

- ***Development of Distribution Network and Connectivity***

  A distribution network is established for supply of treated water from storage facilities to end users. This includes laying of pipelines, installation of valves, meters and associated infrastructure. The network is designed based on service area requirements and hydraulic considerations. Household tap connections are provided to enable last-mile connectivity. The distribution system forms an integral part of the overall water supply infrastructure developed under the project.

- ***Water Supply and Distribution***

  Water is supplied to consumers through the distribution network in accordance with project-specific supply arrangements. Supply may be carried out in scheduled intervals, including designated time periods such as morning and evening cycles. Flow of water is regulated through valves and control systems within the network. The distribution is undertaken based on operational planning and demand considerations. This stage represents the final delivery of treated water to end users.

- ***Operation and Maintenance (O&M)***

  The Company undertakes operation and maintenance of the water supply system in accordance with contractual arrangements. Such activities include routine inspection of infrastructure, maintenance of mechanical and electrical components, and monitoring of system operations. Preventive and corrective maintenance activities are carried out as required. Water quality parameters may be monitored during operations. The O&M function forms part of the overall lifecycle management of the project.

BUSINESS PROCESS

Our Company undertakes infrastructure project execution primarily through a sub-contracting model, wherein projects are awarded to us by principal contractors who have secured contracts from government authorities, public sector undertakings, private sector entities and other project owners. We are engaged by such principal contractors for execution of specified portions of infrastructure projects based on our technical capabilities, execution experience, resource availability and past performance. We generally do not participate in the primary bidding process for project awards and instead focus on the execution of projects received through sub-contracting arrangements.

Under our sub-contracting model, we execute designated portions of infrastructure projects in accordance with technical specifications, quality standards, timelines and other requirements prescribed by the principal contractor and the ultimate project owner. Our responsibilities generally include project planning, mobilization of manpower and equipment, procurement and supply of materials, construction and installation activities, quality control, safety compliance, testing and commissioning of the relevant project components.

We maintain relationships with a network of suppliers, vendors and subcontractors to support efficient project execution. Procurement activities are undertaken based on project-specific requirements and approved technical specifications. We seek to optimize procurement costs while ensuring timely availability of materials and adherence to quality standards required under the respective contracts.

Project execution is carried out through a combination of our in-house project management team, technical personnel, site supervisors and contract labour, supplemented by specialized agencies wherever required. We monitor project progress through regular review mechanisms to ensure compliance with contractual milestones, quality standards and safety requirements.

In projects where operation and maintenance services form part of our contractual obligations, we provide post-commissioning support, including operation, preventive and corrective maintenance, performance monitoring and related services for the period specified under the respective contracts.

- ***Project Identification and work order***

  Our Company operates under a sub-contracting model and does not participate directly in the tendering process. Project opportunities are identified through our established relationships with principal contractors who have been awarded infrastructure projects by government authorities and other entities. Based on our technical capabilities, past execution experience of Promoter and commercial understanding, we engage with such contractors for undertaking specific portions of the project work. This approach enables us to participate in large-scale infrastructure projects without direct exposure to bidding risks.

- ***Site visit and Planning***

  The Company's technical team undertakes site visits to assess site conditions, accessibility, logistical requirements and resource availability. Planning, technical specifications, drawings, execution methodology and resource requirements are coordinated with the principal contractor and other relevant stakeholders.

- ***Site Preparation:***

  Before commencing construction, the Company prepares the construction site by clearing vegetation, removing obstacles, and levelling the terrain as needed.

  They establish temporary facilities such as storage areas etc. to support the construction activities.

- ***Procurement of Materials:***

  The procurement process commences upon identification of material requirements for a particular project. Based on the requirements, technical specifications, quality standards and quantities specified by the principal contractor/project requirements, the Company identifies and evaluates suitable vendors for procurement of the required materials.

- ***Project Execution, Supervision and Quality Control***

The execution phase involves carrying out civil works, pipeline laying, installation of systems and other project-specific activities in accordance with agreed specifications and standards. During this phase, projects are subject to periodic inspections by principal contractor to ensure compliance with technical specifications, quality benchmarks and safety standards.

- ***Final Inspection and Handover***

After completing construction and commissioning activities, the Company will conduct a final inspection to verify that all work complies with the contract requirements, regulatory standards, and approved plans.

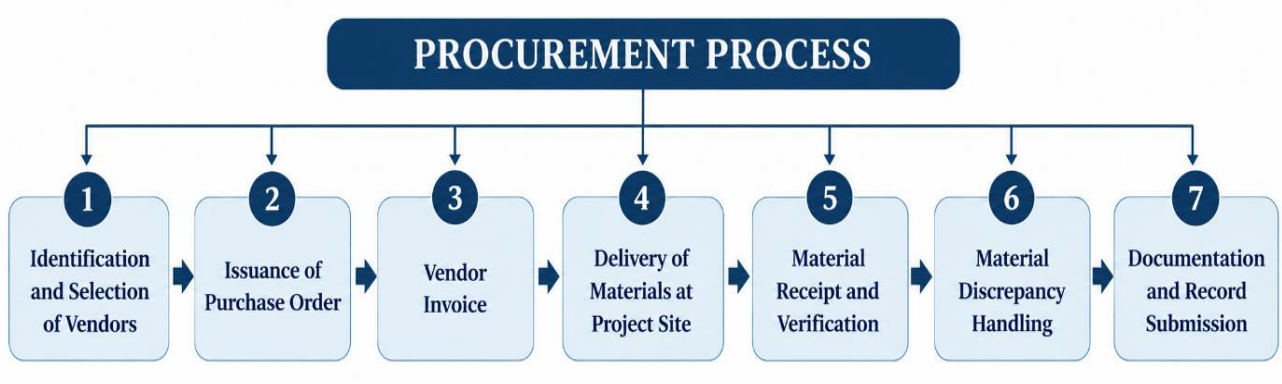

Any deficiencies or discrepancies are identified and rectified before formal acceptance and handover of the project to the client or relevant authorities.

- ***Maintenance and Support:***

Depending on the terms of the contract, the Company may/will provide ongoing maintenance and support services to ensure the long-term performance and reliability of the water infrastructure system.

It may involve routine maintenance tasks such as inspections, repairs, and replacements of components, as well as emergency response services in the event of failures or disruptions.

OUR PROCUREMENT PROCESS

- ***Identification and Selection of Vendors***

The procurement process commences upon identification of material requirements for a particular project. Based on the requirements, technical specifications, quality standards and quantities specified by the principal contractor/project requirements, the Company identifies and evaluates suitable vendors for procurement of the required materials.

- ***Issuance of Purchase Order***

Upon selection of the vendor, the Company places a Purchase Order ("PO") specifying the required materials, quantities, applicable specifications, agreed prices, delivery schedule, delivery location, payment terms and other relevant commercial terms and conditions.

- ***Vendor Invoice***

After acceptance of the Purchase Order, the selected vendor processes the order and raises an invoice in accordance with the materials supplied and the terms and conditions stipulated in the Purchase Order.

- ***Delivery of Materials at Project Site***

The vendor dispatches and delivers the required materials directly to the designated project/work site in accordance with the delivery schedule and other terms specified in the Purchase Order. The materials are accompanied by relevant delivery documents and invoices, as applicable.

- ***Material Receipt and Verification***

Upon delivery of the materials at the project site, the Site In-Charge and/or Store Manager performs a detailed inspection and verification process. The materials received are checked against the Purchase Order with respect to quantity, quality, specifications, and physical condition. Any shortages, damages, or deviations from the approved specifications are immediately reported to the Procurement Department for necessary corrective action. Upon satisfactory verification, the materials are accepted and recorded in the site inventory.

- ***Material Discrepancy Handling***

  Upon receipt of the GRN and supporting documentation, the Accounts Department shall coordinate with the vendor to resolve the discrepancy and obtain appropriate corrective action, including replacement of materials, issuance of a credit note, refund of the corresponding value, or any other mutually agreed settlement.

- ***Documentation and Record Submission***

  Following successful verification of the materials, a Goods Receipt Note (GRN) is prepared and approved by the authorized site personnel as evidence of receipt and acceptance. The GRN, along with the Purchase Order, Tax Invoice, and other relevant supporting documents, is submitted to the Procurement Department and Accounts Department for record maintenance, payment reconciliation, and audit purposes. The procurement transaction is considered complete only after all documentation has been duly verified, recorded, and maintained in accordance with the Company's internal control and compliance requirements.

RAW MATERIAL

We operate an asset-light execution model, wherein the on-ground execution of projects is carried out through petty subcontractors engaged on a project-specific basis. These subcontractors are responsible for arranging the required raw materials, logistics, equipment, manpower, and other execution-related resources.

Our in-house Project Management Team supervises, monitors, and coordinates the execution to ensure adherence to quality standards, project specifications, safety requirements, and timelines. This model enables us to avoid significant capital investment in equipment and logistics while reducing costs associated with asset ownership, maintenance, depreciation, and financing, thereby enhancing operational efficiency and improving profit margins.

The Central Government may also enter into an agreement with any person (being, either an individual, a partnership firm, a company, a joint venture, a consortium or any other form of legal entity, Indian or foreign, capable of financing from own resources or funds raised from financial institutions, banks or open market) in relation to the development and maintenance of the whole or any part of a 'National Highway'. Such an agreement may provide for designing and building a project and operating and maintaining it, collecting fees from users during an agreed period, which period together with construction period is usually referred to as the 'concession period'. Upon expiry of the 'concession period', the right of the person to collect fees and his obligation to operate and maintain the project ceases and the facility stands transferred to the central government.

Under the National Highways Act, 1956 (the "**NH Act**"), the Central Government is vested with the power to declare a highway as a national highway and also to acquire land for this purpose. The Central Government may, by notification, declare its intention to acquire any land when it is satisfied that for a public purpose such land is required to be acquired for the building, maintenance, management or operation of a national highway or part thereof. The NH Act prescribes the procedure for such land acquisition which inter alia includes entering and inspecting such land, hearing of objections, declaration of acquisition and the mode of taking possession. The NH Act also provides for payment of compensation to owners and any other person whose right of enjoyment in that land has been affected.

4. National Highways Authority of India Act, 1988

However, the NHAI may enter into contracts exceeding the value so specified, on obtaining prior approval of the Central Government. NHAI Act provides that the contracts for acquisition, sale or lease of immovable property on behalf of the NHAI cannot exceed a term of 30 years unless previously approved by the Central Government.

5. The Right To Fair Compensation And Transparency In Land Acquisition, Rehabilitation And Resettlement Act, 2013("RFCTLARR Act")

An Act to ensure, in consultation with institutions of local self-government and Gram Sabhas established under the Constitution, a humane, participative, informed and transparent process for land acquisition for industrialisation, development of essential infrastructural facilities and urbanisation with the least disturbance to the owners of the land and other affected

families and provide just and fair compensation to the affected families whose land has been acquired or proposed to be acquired or are affected by such acquisition and make adequate provisions for such affected persons for their rehabilitation and resettlement and for ensuring that the cumulative outcome of compulsory acquisition should be that affected persons become partners in development leading to an improvement in their post-acquisition social and economic status and for matters connected therewith or incidental thereto. The provisions relating to land acquisition are now governed by the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as applicable in Uttar Pradesh along with the Uttar Pradesh Rules, 2016.

The Requiring Body or any person aggrieved by the Award passed by an Authority under section 69 may file an appeal to the High Court within sixty days from the date of Award: Provided that the High Court may, if it is satisfied that the appellant was prevented by sufficient cause from filing the appeal within the said period, allow it to be filed within a further period not exceeding sixty days.

6. Urban Land (Ceiling and Regulation) Act, 1976 (the "ULCA") & Urban Land (Ceiling and Regulation) Repeal Act, 1999 ("ULCRA Repeal Act")

The ULCA prescribes the limits to urban areas that can be acquired by a single entity. The ULCA allows the government to take over a person's property and fixes ceilings on vacant and urban land. Under the ULCA, excess vacant land is required to be surrendered to a competent authority for a minimum level of compensation. Alternatively, the competent authority has been empowered to allow the land to be developed for permitted purposes. Even though the ULCA has been repealed, it remains in force in certain States like Haryana, Punjab, Gujarat, Karnataka, Madhya Pradesh, Rajasthan, Orissa and the Union Territories. While the Urban Land (Ceiling and Regulation) Act, 1976 was repealed by the Urban Land (Ceiling and Regulation) Repeal Act, 1999, the repeal becomes operative only upon adoption by the respective State Governments. Accordingly, upon adoption by a State such as Uttar Pradesh by a notification dated 18.03.1999. The provisions of ULCA cease to apply within that State, subject to saving of cases where possession of excess land had already been taken prior to repeal

7. Uttar Pradesh Revenue Code, 2006

Uttar Pradesh Revenue Code, 2006, this Code serves as the main law governing land revenue administration in the State of Uttar Pradesh. It brings together and replaces several earlier land laws, creating a clear and unified framework for managing land-related matters such as land tenure, maintenance of records, revenue collection, and dispute resolution. The Code clearly outlines the rights and responsibilities of tenure holders, including bhumidhars and asamis, and covers key aspects like land use, transfer, mutation, partition, and eviction. The detailed procedures for implementing these provisions are further provided under the Uttar Pradesh Revenue Code Rules, 2016, ensuring smooth and effective administration.

LABOUR AND EMPLOYMENT RELATED LAWS

In a historic decision, the Government of India has announced the implementation of the four Labour Codes - The Code on Wages, 2019, The Industrial Relations Code, 2020, The Code on Social Security, 2020 and The Occupational Safety, Health and Working Conditions Code, 2020 with effect from 21st November 2025, rationalising 29 existing labour laws. By modernising labour regulations, enhancing workers' welfare and aligning the labour ecosystem with the evolving world of work, this landmark move lays the foundation for a future-ready workforce and stronger, resilient industries driving labour reforms for Aatmanirbhar Bharat.

THE CODE ON WAGES, 2019

The Code on Wages, 2019 seeks to simplify, consolidate, and rationalize the provisions of four existing laws- The Payment of Wages Act, 1936; The Minimum Wages Act, 1948; The Payment of Bonus Act, 1965; and The Equal Remuneration Act, 1976. It aims to strengthen workers' rights while promoting simplicity and uniformity in wage-related compliance for employers.

Major Highlights

- **Universal Minimum Wages**: The Code establishes a statutory right to minimum wages for all employees across both organized and unorganized sectors. Earlier, the Minimum Wages Act applied only to scheduled employments covering ~30% of workers.
- **Introduction of Floor Wage**: A statutory floor wage shall be set by the Government based on minimum living standards, with scope for regional variation. No state can fix minimum wages below this level, ensuring uniformity and adequacy nationwide.
- **Criteria for Wage Fixation:** Appropriate Governments will determine minimum wages considering workers' skill levels (unskilled, skilled, semi-skilled and highly skilled), geographic areas, and job conditions such as temperature, humidity, or hazardous environments.

- **Gender Equality in Employment:** Employers shall not discriminate on the basis of gender, including transgender identity, in recruitment, wages, and employment conditions for similar work.
- Universal Coverage for Wage Payment: Provisions ensuring timely payment and preventing un-authorized deductions will apply to all employees, irrespective of wage limits (currently applicable only to employees earning up to ₹24,000/month).

- **Overtime Compensation**: Employers must pay all employees overtime wages at least twice the normal rate for any work done beyond the regular working hours.
- **Responsibility for Wage Payment:** Employers, including companies, firms, or associations, shall pay wages to employees employed by them. Failure to do so makes the proprietor/ entity liable for unpaid wages.
- **Inspector-cum-Facilitator:** The traditional role of "Inspector" is replaced with "Inspector-cum-Facilitator," emphasizing guidance, awareness, and advisory roles alongside enforcement to improve compliance.
- **Compounding of Offences:** First-time, non-imprisonable offences can be compounded by paying a penalty. Repeat offences within five years, however, cannot be compounded.
- **Decriminalization of Offences**: The Code replaces imprisonment for certain first-time offences with monetary fines (up to 50% of the maximum fine), making the framework less punitive and more compliance-oriented.

THE INDUSTRIAL RELATIONS CODE, 2020

The Industrial Relations Code (IR Code) has been prepared after amalgamating, simplifying and rationalizing the relevant provisions of the Trade Unions Act, 1926, the Industrial Employment (Standing Orders) Act, 1946 and the Industrial Disputes Act, 1947. The Code acknowledges the fact that survival of worker depends upon survival of industry. In this backdrop, it simplifies laws related to trade unions, conditions of employment in industrial establishment or undertaking, investigation and settlement of industrial disputes.

Major Highlights

- **Fixed Term Employment (FTE):** Allows direct, time-bound contracts with full parity in wages and benefits; gratuity eligibility after one year. The provision reduces excessive contractualization and offers cost efficiency to employers.
- **Re-skilling Fund:** To train retrenched employees, this fund has been set up from the contribution to be made by an industrial establishment for an amount equal to 15 days' wages for every worker retrenched. This is in addition to retrenchment compensation. The amount will be credited to the workers account within 45 days of retrenchment.
- **Trade Union Recognition**: Unions with 51% membership get recognition as the Negotiating Union; otherwise, a Negotiating Council is formed from unions, not less than 20% membership of trade union. Such an arrangement strengthens collective bargaining.
- **Expanded Worker Definition:** Covers sales promotion staff, journalists, and supervisory employees earning up to ₹18,000/month.
- **Broader Definition of Industry:** Includes all systematic employer-employee activities, regardless of profit or capital, widening access to labour protections.

Explanation of KPIs:

(1) Revenue from operations comprises the domestic operating revenue presented in Note 20 to the Restated Financial Statements.

(2) EBITDA is calculated as profit before tax plus depreciation and amortisation plus interest on bank and unsecured loans.

(3) EBITDA margin is EBITDA divided by revenue from operations, multiplied by 100.

(4) PAT is profit before tax less total tax expense.

(5) PAT margin is PAT divided by revenue from operations, multiplied by 100.

(6) Return on equity is PAT divided by average shareholders' equity, multiplied by 100.

(7) Debt-to-equity ratio is long-term borrowings plus short-term borrowings, divided by total equity.

(8) Current ratio is current assets divided by current liabilities.

(9) Return on capital employed reflects the return generated on the capital employed in the business.

(10) Total income is revenue from operations plus other income.

(11) Net debt is long-term and short-term borrowings less cash and cash equivalents, other bank balances and mutual-fund investments. The bank balances deducted include pledged fixed deposits; net debt therefore does not measure unrestricted liquidity.

(12) Total equity is share capital plus reserves and surplus.

(13) Basic and diluted EPS is restated PAT attributable to equity shareholders divided by the weighted-average number of equity shares, expressed in rupees per share.

The March 30, 2024 rights issue was time-weighted for two days in FY 2023-24. The unusually high comparative EPS reflects the smaller weighted-average share count; the subsequent share issue was also time-weighted.

FINANCIAL YEAR ENDED MARCH 31, 2026 COMPARED WITH THE FINANCIAL YEAR ENDED MARCH 31, 2025

Total Income
Total income increased by ₹2,462.16 lakhs, or 79.29%, to ₹5,567.49 lakhs in FY 2025-26 from ₹3,105.32 lakhs in FY 2024-25. The increase was mainly due to the ₹2,397.56 lakhs increase in revenue from operations, together with higher other income.

Revenue from Operations
Revenue from operations increased by 77.79% to ₹5,479.58 lakhs in FY 2025-26 from ₹3,082.02 lakhs in FY 2024-25. The increase arose entirely in domestic revenue. Sales to related parties decreased to ₹679.21 lakhs from ₹1,338.55 lakhs, while the balance of operating revenue increased to ₹4,800.37 lakhs from ₹1,743.46 lakhs. Accordingly, growth in the remaining domestic business more than offset the reduction in related-party sales. Higher materials consumed and construction and works-contract expenses are consistent with a higher level of business activity. The separate effects of volume and price changes are not quantified.

Other Income
Other income increased by 277.21% to ₹87.91 lakhs from ₹23.31 lakhs. Fixed-deposit interest increased to ₹59.47 lakhs from ₹23.31 lakhs, and creditor balances of ₹28.27 lakhs were written back in FY 2025-26 compared with nil in FY 2024-25. The higher interest income was accompanied by an increase in year-end fixed deposits pledged against bank facilities.

Total Expenses
Total expenses increased by 89.19% to ₹4,539.49 lakhs from ₹2,399.40 lakhs. The increase was mainly due to higher materials consumed and finance costs, partly offset by the change in work-in-progress from an inventory expense in FY 2024-25 to an inventory credit in FY 2025-26. Total expenses increased to 81.54% of total income from 77.27%.

Cost of Materials Consumed

Cost of materials consumed increased by 245.32% to ₹3,567.73 lakhs from ₹1,033.17 lakhs. Material purchases increased to ₹4,688.97 lakhs from ₹1,349.38 lakhs. This was partly offset by the increase in closing raw-material inventory to ₹1,437.46 lakhs from ₹316.21 lakhs. These movements are consistent with increased material requirements for the business.

Direct Expenses

Direct expenses increased by 2.10% to ₹681.24 lakhs from ₹667.20 lakhs. Construction and works-contract expenses increased to ₹599.95 lakhs from ₹508.32 lakhs, with higher site and hire expenses. These increases were largely offset by lower power and fuel expenses and nil borewell charges compared with ₹51.20 lakhs in FY 2024-25.

Changes in Inventories

The inventory movement was a credit of ₹240.06 lakhs in FY 2025-26, compared with an expense of ₹412.63 lakhs in FY 2024-25. Closing work-in-progress increased from nil to ₹240.06 lakhs in FY 2025-26. This produced a favourable expense movement of ₹652.69 lakhs between the two years.

Employee Benefits Expense

Employee benefits expense increased by 19.67% to ₹185.17 lakhs from ₹154.74 lakhs. Salaries increased to ₹125.61 lakhs from ₹60.56 lakhs, with higher statutory contributions and gratuity, partly offset by directors' remuneration declining to ₹51.29 lakhs from ₹90.00 lakhs.

Finance Costs

Finance costs increased by 147.47% to ₹250.20 lakhs from ₹101.10 lakhs. The main contributor was bank interest, which increased to ₹165.55 lakhs from ₹48.16 lakhs. Interest on unsecured loans, MSME late-payment interest and bank charges also increased. Total long-term and short-term borrowings increased to ₹2,646.66 lakhs at March 31, 2026 from ₹1,298.54 lakhs at March 31, 2025, consistent with the higher funding requirement reflected in inventories, receivables and advances.

Depreciation and Amortisation Expense

Depreciation and amortisation expense increased by 679.80% to ₹5.08 lakhs from ₹0.65 lakhs, reflecting the expanded asset base. Property, plant and equipment additions were ₹39.52 lakhs in FY 2025-26, principally vehicles, compared with ₹9.71 lakhs in FY 2024-25.

Other Expenses

Other expenses increased by 201.39% to ₹90.12 lakhs from ₹29.90 lakhs. The main increases were in professional charges, fees and taxes, mess food expenses, rent and security expenses. Professional charges increased to ₹13.75 lakhs from ₹0.94 lakhs, and rent increased to ₹16.80 lakhs from ₹8.86 lakhs.

Restated Profit Before Tax

Restated profit before tax increased by 45.62% to ₹1,027.99 lakhs from ₹705.92 lakhs, as the increase in total income exceeded the increase in total expenses in absolute terms. However, profit before tax as a percentage of total income declined to 18.46% from 22.73%, reflecting the faster percentage growth in expenses.

Restated Profit After Tax

Restated profit after tax increased by 49.94% to ₹733.22 lakhs from ₹489.01 lakhs. Total tax expense increased to ₹294.77 lakhs from ₹216.91 lakhs. PAT margin declined to 13.38% from 15.87% because profit grew more slowly than revenue from operations.

FINANCIAL YEAR ENDED MARCH 31, 2025 COMPARED WITH THE FINANCIAL YEAR ENDED MARCH 31, 2024

Total Income

Total income increased by 159.98% to ₹3,105.32 lakhs in FY 2024-25 from ₹1,194.43 lakhs in FY 2023-24. This was mainly due to higher revenue from operations, supplemented by higher fixed-deposit interest income.

Revenue from Operations

Revenue from operations increased by ₹1,887.95 lakhs, or 158.11%, to ₹3,082.02 lakhs from ₹1,194.06 lakhs. The increase arose entirely in domestic revenue and was mainly attributable to higher sales to related parties. These sales increased to ₹1,338.55 lakhs from ₹3.90 lakhs, including sales of ₹1,226.47 lakhs to Shri Radha Infra India Private Limited compared with nil in FY 2023-24. The balance of operating revenue increased to ₹1,743.46 lakhs from ₹1,190.17 lakhs. Higher materials consumed and construction and works-contract expenses are consistent with the increase in business activity; the separate effects of volume and price changes are not quantified.

Other Income

Other income increased to ₹23.31 lakhs from ₹0.37 lakhs, an increase of ₹22.93 lakhs. This was almost entirely due to fixed-deposit interest increasing to ₹23.31 lakhs from ₹0.37 lakhs. The percentage increase of 6,173.81% reflects the low FY 2023-24 base.

Total Expenses

Total expenses increased by 238.05% to ₹2,399.40 lakhs from ₹709.77 lakhs. The main drivers were the movement in work-in-progress, higher materials consumed, direct expenses, employee benefits and finance costs. The work-in-progress movement changed from a credit of ₹412.63 lakhs in FY 2023-24 to an expense of ₹412.63 lakhs in FY 2024-25. Total expenses increased to 77.27% of total income from 59.42%.

Cost of Materials Consumed

Cost of materials consumed increased by 106.99% to ₹1,033.17 lakhs from ₹499.15 lakhs. Purchases increased to ₹1,349.38 lakhs from ₹499.15 lakhs, partly offset by closing raw-material inventory of ₹316.21 lakhs compared with nil in FY 2023-24. The increase is consistent with the higher level of business activity.

Direct Expenses

Direct expenses increased by 34.52% to ₹667.20 lakhs from ₹496.00 lakhs. This was mainly due to construction and works-contract expenses increasing to ₹508.32 lakhs from ₹356.45 lakhs and higher power and fuel expenses, partly offset by lower site expenses and freight.

Changes in Inventories

Work-in-progress of ₹412.63 lakhs at the beginning of FY 2024-25 reduced to nil at year-end, resulting in an inventory expense of ₹412.63 lakhs. FY 2023-24 had an inventory credit of ₹412.63 lakhs as closing work-in-progress increased from nil. The resulting year-on-year expense increase was ₹825.26 lakhs.

Employee Benefits Expense

Employee benefits expense increased by 131.49% to ₹154.74 lakhs from ₹66.84 lakhs. The increase was mainly due to directors' remuneration rising to ₹90.00 lakhs from ₹40.00 lakhs and salaries increasing to ₹60.56 lakhs from ₹23.97 lakhs.

Finance Costs

Finance costs increased by 370.60% to ₹101.10 lakhs from ₹21.48 lakhs. This was principally due to bank interest increasing to ₹48.16 lakhs from ₹0.43 lakhs, together with higher bank charges and interest on unsecured loans, MSME balances and delayed statutory dues. Total borrowings increased to ₹1,298.54 lakhs at March 31, 2025 from ₹526.96 lakhs at March 31, 2024.

Depreciation and Amortisation Expense

Depreciation and amortisation expense increased by 214.77% to ₹0.65 lakhs from ₹0.21 lakhs. This reflected

the larger asset base following additions of ₹9.71 lakhs in FY 2024-25, comprising vehicles and computers.

Other Expenses

Other expenses decreased by 22.77% to ₹29.90 lakhs from ₹38.72 lakhs. The decrease was mainly due to professional charges falling to ₹0.94 lakhs from ₹11.44 lakhs, together with lower mess food and office expenses. These reductions were partly offset by higher rent and certain other overheads.

Restated Profit Before Tax

Restated profit before tax increased by 45.65% to ₹705.92 lakhs from ₹484.66 lakhs. The increase in total income exceeded the increase in expenses in absolute terms. However, profit before tax as a percentage of total income declined to 22.73% from 40.58%, reflecting higher expenses relative to income, including the work-in-progress movement.

Restated Profit After Tax

identified, although their amounts are presently unascertainable. These matters should be read together with the contingent-liability and commitment disclosures in this Draft Red Herring Prospectus. Audit qualifications, if any, which have not been given effect in the Restated Financial Statements are addressed in the chapter titled "Restated Financial Information" of this Draft Red Herring Prospectus.

QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Financial Market Risks

Our financial position reflects exposure to borrowing costs, input costs and the collection of customer balances. These matters should be read together with the section titled "Risk Factors" in this Draft Red Herring Prospectus.

Interest Rate Risk

Our finance costs include interest on bank and unsecured borrowings. Total borrowings were ₹2,646.66 lakhs at March 31, 2026, compared with ₹1,298.54 lakhs at March 31, 2025. Changes in applicable borrowing rates and funding requirements may affect our finance costs and debt-servicing obligations.

Effect of Inflation

Changes in construction-material costs, employee costs and other operating expenses may affect our margins. The extent to which cost increases can be recovered from customers depends on the terms of the underlying contracts.

Credit Risk

We are exposed to collection risk on amounts owed by customers. Trade receivables were ₹3,574.95 lakhs at March 31, 2026, ₹2,679.15 lakhs at March 31, 2025 and ₹691.91 lakhs at March 31, 2024. Delayed or unsuccessful collections may affect liquidity and require provisions or write-offs. The operating cash outflows discussed above reflect the cash absorbed in receivables and other working-capital balances.

Other Matters

Defaults in Payment of Statutory Dues or Repayment of Borrowings, Deposits or Debentures

Interest on late payment of statutory dues was ₹3.82 lakhs, ₹7.74 lakhs and ₹0.92 lakhs in FY 2025-26, FY 2024-25 and FY 2023-24, respectively, together with related late fees. The Company has not been declared a wilful defaulter. Any other matters relating to delays or defaults are addressed in the relevant financial and risk disclosures of this Draft Red Herring Prospectus.

Material Frauds

Material fraud matters reported by the statutory auditors, if any, are addressed in the relevant disclosures of this Draft Red Herring Prospectus.

Unusual or Infrequent Events or Transactions

An earlier-year income-tax adjustment of ₹270.55 lakhs was recorded in reserves and surplus in FY 2025-26, and creditor balances of ₹28.27 lakhs were written back in other income. These items should be considered when assessing year-to-year comparability. Other unusual or infrequent transactions, if any, should be read with the disclosures elsewhere in this Draft Red Herring Prospectus.

Significant Economic Changes Affecting Income from Continuing Operations

Our operations may be affected by changes in the economic and regulatory environment. Significant economic

changes that have materially affected, or are likely to affect, income from continuing operations are discussed in the section titled "Risk Factors" of this Draft Red Herring Prospectus.

Known Trends or Uncertainties Affecting Revenue or Income from Continuing Operations
Revenue and profits increased over the three years, while PAT margins declined and operating cash flows remained negative. These movements, together with the increased borrowings and working-capital balances, are discussed above. Other known trends or uncertainties are discussed in the section titled "Risk Factors" of this Draft Red Herring Prospectus.

Future Relationship Between Costs and Income
The historical relationship between costs and income is discussed in the year-on-year comparisons above. Higher revenue did not translate into proportionate profit growth, as expenses increased faster in percentage terms. Future margins will depend on the revenue earned, contract costs, working-capital requirements and borrowing costs; the historical margins should not be assumed to continue unchanged.

Extent to Which Revenue Growth Reflects Volume, New Products or Services, or Prices
Revenue movements are explained in the year-on-year comparisons above with reference to domestic revenue and related-party sales. The contribution of changes in volumes, prices, or new products or services is not separately quantified.

Dependence on a Single or a Few Suppliers or Customers
For customer and supplier concentration, please refer to "Our Major Customers" and "Our Major Suppliers" in the chapter titled "Our Business" of this Draft Red Herring Prospectus.

Status of Publicly Announced New Products or Business Segments
Please refer to the chapter titled "Our Business" of this Draft Red Herring Prospectus for details of publicly announced new products or business segments, if any.

Extent to Which the Business Is Seasonal
The nature and seasonality of our business, including its effect on project execution, revenue and cash flows, are discussed in the chapter titled "Our Business" of this Draft Red Herring Prospectus.

Competitive Conditions
Competitive conditions are described in the chapter titled "Our Business" of this Draft Red Herring Prospectus.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, amongst others equity shares. Pursuant to the SEBI UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by IBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the SEBI UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an II had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by IIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023

and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public offer closure to listing has been reduced from six Working Days to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

This Offer will be made under UPI Phase III of the UPI Circular.

All SCSBs offering the facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and/or payment instructions of the Individual Bidders using the UPI Mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalized under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the Book Running Lead Manager will be required to compensate the concerned investor.

For further details, refer to the General Information Document available on the website of the Stock Exchange and the Book Running Lead Manager.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks make an application as prescribed in Annexure I of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and provide a written confirmation on compliance with SEBI circular no.
